

TEN PINS

Stanzak Bros. bowling team from Waukegan, defeated the Highland Park Lions club team by 30 pins in a match game Sunday afternoon at Highland Ten alleys. It was an interesting match in that the Stanzak team was composed of five brothers from a family of nine boys or a baseball nine.

Another interesting game was the match between Swanson's ladies and Swanson's men's team, the girls defeating the men.

N.S. Yacht Club To Release Anchor On Spring Activity

This is the time of year when tarpaulins come off boats and scrapers and brushes are wielded with enthusiasm in anticipation of summer's racing and cruising.

Highland Park's North Shore Yacht Club sets the date of Thursday evening, April 17th for the official opening of spring activity. By then many boats will be completely reconditioned, but to encourage the tardy ones and to arouse the less hardy among the membership who don't brave arctic conditions to keep up with club activities during the winter, the evening will be the "all out" signal.

A program of entertainment, refreshment and exhibits, not to mention much hand-shaking and yarn-spinning, has been worked out to encourage the racing season start which is set for Decoration Day week end.

Harvey S. Olson To Direct College Division, Eversharp

Mr. Martin L. Strauss, President of Eversharp, Inc., of Chicago, (formerly of Highland Park) has announced the formation of a College Division of his company for the further promotion of its products in the Intercollegiate Sphere. Harvey S. Olson, of Ravinia, has been named Director of the College Division of Eversharp. Mr. Olson was formerly president of Campus Tours, Inc., of Chicago, New York, London, and Paris.

Just a year ago Mr. Ralph A. Bard, a resident of Highland Park and a leading Chicago industrialist, and Mr. Martin L. Strauss, who has had a long experience in the Department Store, Chain Store, and Advertising Agency business, were instrumental in forming a new, vital company, Eversharp, Inc., to carry on the activities of the old Wahl Co., which company is no longer in existence. In the twelve month period in which this company has been operating it has distinguished itself as a manufacturing organization with a retail point of view. The many merchandising innovations introduced during the past year are climaxed by the announcement of this new College Division, designed to give added merchandising impetus to retailers in the college towns throughout the country.

Mr. Olson is entirely familiar with the College Market. For the past decade his company, Campus Tours, Inc., operated over a wide area, creating sales organizations in several hundred colleges. Student tours to Europe were sold on a large scale through these merchandising units. So effective were the sales plans of this organization that in ten years' time, Campus Tours became one of the foremost organizations of its kind in the country. The outbreak of the war terminated the activities of Campus Tours and made Mr. Olson available to Eversharp, Inc.

A graduate of Purdue University, class of 1929, Mr. Olson was captain of the Boilermaker Football team in 1928. Since his graduation Mr. Olson has been active in Alumni work both here and in New York City.

As Director of the College Division Mr. Olson will have charge of the sales policy of his company in 825 Colleges from Coast to Coast. The establishment of such a division marks another of the many retail-minded moves on the part of Eversharp, Inc.

LIBRARY

Spring is certainly around the corner. The Meadowlark is singing in the field and the first robins have arrived to look over the situation. One by one they will follow—the Bluebird, the Blackbird, the Phoebe, the Flicker, etc., and each one spells Spring.

Whoever watches the birds must be impressed by the way they fulfill the duties nature has bestowed upon them. "The labor is so adjusted as to give to each class of birds duties as distinct as a cook's from a chambermaid's."

Some are sweeping the air keeping down big and little insects. Others clean the foliage, the twigs and the branches of trees and shrubbery, where countless insects deposit their eggs; where larvae, plant lice, leafhoppers, flies and locusts do damage. Some are caretakers of the bark saving our timber from legions of enemies. And what about the ground itself with its hordes of harmful insects, weeds and seeds? Our feathered friends inspect that too, and through their ceaseless work contribute more to our national wealth than we can possibly estimate.
