

Don't forget

Lighting ... not only in the home itself but outside on the porch or near the garage door, good lighting is important. A convenience and a comfort that costs but little.

Don't forget

Night air cooling system ... easy to include in any plans and a big help to summer comfort. Just a flip of the switch and a powerful attic fan draws in cool night air through open downstairs windows.

University of Illinois Library
Urbana, Ill.

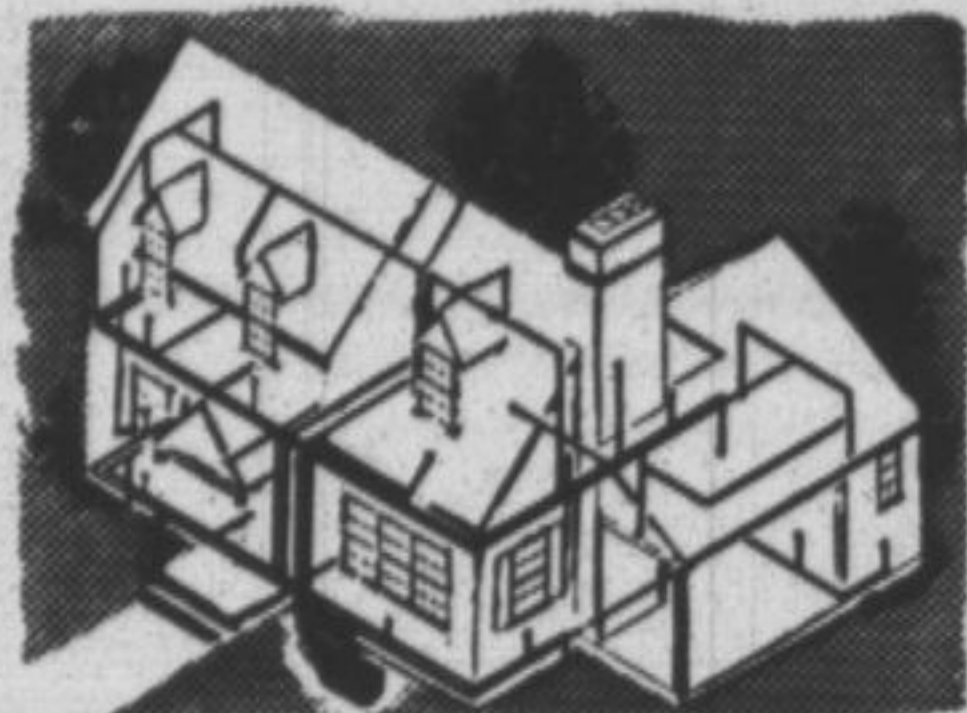

Don't forget

Air conditioning ... perhaps you'll want to include an electric room cooler in your plans. Complete home air conditioning systems are also available—certainly you should plan your present wiring to take care of this electric aid in the near future.

Reminders...

for people building and remodeling homes

Don't forget

Adequate wiring ... this includes plenty of outlets, plenty of lights and plenty of fixtures—all in just the right places. Better make sure too that wiring is adequate to take care of future needs. You'll save money this way.

Don't forget

Kitchen appliances ... be sure your kitchen has a full complement of electric aids, including the all-important refrigerator! And don't forget a roaster, mixer, toaster, waffle iron, and coffee maker, or the kitchen vent-fan to whisk out cooking odors and keep you cooler.

Don't forget ... if you want full particulars on these or any other electric services, get in touch with this company. We shall be pleased to furnish you with installation and operating cost estimates, make recommendations and assist you in every way possible—all without obligation.
