CRANBERRY POP-UPS

ELIGHTFUL quick rolls such as these tasty Cranberry Pop-Ups give an exhilarating lift to winter menus. They are excellent with thick chowders for simple suppers and pleasing with company dinners. The scarlet tartness of the cranberries rolled up in golden-crusted scones makes an eye-pleasing combination.

Rolls like these appeal to hun-gry men and starved, outdooractive children. Made with enriched flour these quick rolls are economical contributors of those needed B-vitamins and iron. They are full of quick energy too, for Americans who must be on their productive toes.

Welcome too, are Cranberry Pop-Ups because seasonal foods are kind to war-pinched budgets. Plan to serve them often these tag-end winter days.

CRANBERRY POP-UPS 2 cups sifted flour 3 teaspoons baking powder teaspoon salt tablespoons shortening

Turn out on lightly floured board and knead a half Roll out into a long, narrow rectangular sheet about 1/4 inch thick. Spread with Cranberry-Orange Filling. Roll up jelly-roll fashion and seal edge. Cut into inch slices and place cut side down into well-greased muffin pans. Brush with diluted egg white and sprinkle with sugar. Bake in a moderately hot oven (425° F.) 12 to 15 minutes.

MILLIONS of flashlights, now lying around in American homes, can be put to work in the event of blackouts, thus relieving the drain which the purchase of new lights would place on critical metals and plastics, according to Leon Henderson, Director of the Division of Civilian Supply, Office of Production Management.

Disturbed by reports that thousands of Americans are trying to buy new flashlights, Mr. Henderson has obtained a survey which shows that a large majority of families need not fear being without illumination in the event of blackouts.

Seventy per cent of families in the United States, the survey discloses, now have one or more flashlights. Forty per cent of families have flashlights which are in perfect condition, ready for service at a moment's notice. Another 23 per cent have lights which can be made usable merely by the purchase of fresh batteries. Seven per cent of all families have inoperative flashlights, many of which need only minor repairs in order to give excellent service.

"The demand for new flashlights can be greatly lessened," Mr. Henderson points out, "by a conditioned represents an im- ting our millions of old flashlights portant saving of materials need- to work."
