

Things I Never Know And Still Don't Know:

Whether the sugar-rationing here isn't extremely mild compared to Germany, where it's verboten to use any sugar at all for sweetening coffee or tea... That the secret of Winston Churchill's amazing energy is the old Edison formula of grabbing quickie snoozes through the day... Whether motorists know if they don't wear a hat while driving, they suffer greater eyestrain... If it wouldn't be a good idea for both Republicans and Democrats to adopt this revised slogan: "Now is the time for all good men to come to!"... That Mohammedans begin each meal with salt. (Because they believe it helps prevent most diseases.)... That, according to U. S. health authorities, effective bombing of Japan's overcrowded cities would probably touch off an epidemic of the dread Asiatic cholera there... That among the Betsileos of Madagascar, when a funeral is held for a woman, the procession, before reaching the cemetery, goes back to her home for an hour. (The theory being that women always forget something when they leave home.)... That if you want to get the maximum taste from food, remember these tips: Bitter things taste more strongly on the rear of the tongue, sweet things on the tip, sour things on the sides, and salty things on both the tip and sides... That bad tempers are now blamed on a shortage of vitamin B1 in the diet... Whether you've heard the one about Count Ciano describing his Berlin visit to his father-in-law, Mussolini. "Hitler gave me a wonderful dinner," Ciano related. "Everything was solid gold—the plates, the knives, forks, spoons—all solid gold"... "That's nice," commented Il Duce, holding out his hand. "Let me see!"

—Buy Defense Bonds— A French underground paper recently related this grand fable. The bishop of Bordeaux handed 50 francs to his secretary to give to a poor woman who had requested alms. The secretary protested, "Monsieur is perhaps unaware of the fact that the woman is a Jewess..." "A Jewess!" exclaimed the bishop. "Goodness me, that's altogether different. Give her one hundred francs and thank her for her confidence in Christian charity!"

—Buy Defense Bonds— Highbrows complain about the way swing music hurts the classics. But it's a matter of record that, because popular bands started to swing Tachalkowsky, the sale of that composer's records in the classic manner hit an all-time high... We'd like to see a celeb enter a joynt some time without acting as if he were playing the star role at a coronation... Our idea of paradise is where everybody feels as good as a headwaiter looks... What's become of Technocracy?... The ditty, "I Don't Want to Walk Without You, Baby," is a friend of the ears when played in a slow tempo decorated with strings. When it comes dressed in brass it's an enemy.

—Buy Defense Bonds— The bad news the wireless has been pouring out all week from the South Pacific must put a pain in Goebbels' neck. How can he frighten us with threats of disaster, he must wonder, when our own commentators tell us the raw truth? The more we know the tougher it gets for the Axis liars and scare-mongers... The Berlin radio soaped the Yellow Aryans by announcing that Wotan, the Heilic god, and the Jap god are practically first cousins. That kind of slights the Italians, who must have become de-Aryanized when the Greeks shot the spots off them... The best of Jack Benny's stings gags was his denial that he forced Dennis Day to donate blood for a transfusion. Claimed Benny: "I paid him \$5 a gallon for it"... Almost every time you flip on the radio, you're bound to hear some member of the theatrical profession aiding some worthy war cause.

—Buy Defense Bonds— It actually happened not very long ago in Lindy's when pretty persons invaded the place and peddled defense stamps to the public... Seated at a table in the corner, alone, was a fellow the stamp sellers seemed to avoid... The customers stole furtive glances at him, but tried not to embarrass him. He was not in the least disturbed... Finishing his dinner, he went over to the cashier and paid his \$2 check with a new \$50 bill... Sweeping up the \$48 change, he handed it to one of the stamp-selling ladies, tipped his hat and went out... Apparently an American-born Japanese.

—Buy Defense Bonds— Harvard boys say they don't like Betty Grable, Veronica Lake or Ann Sheridan. Playing hard to get, huh? Talk about bad timing. One radio show plays Hawaiian melodies accompanied by an announcer who drools about the peace and beauty of Hawaii... Here's a good typewriter ribbon from Olim Miller: "If this weren't such a crazy world, it wouldn't be such an interesting one"... Ben Bernie is doing his bit toward boosting the morale of the country. He isn't on the radio.

MADAME DELORE ADVISOR

ONE QUESTION FREE Write for Madame De Lore, Station No. 415, Las Vegas, Nev. 5 for \$1.00

M.P.W.S. Can you tell me who sent the gift with no name on it? The party who sent you the gift is the one that you have in mind and lives northwest from the town where the gift was sent.

M.O.O. When will I have a date with a boy? You will have a date with the boy you have in mind around the first of April.

M.E.S. Where will I be employed? During the coming summer months you will be employed there in your own home town. I do not see any change for you until 1944.

W.M. Will I have to go to the army? You will see military service after your baby is born.

L.E.L. Will my husband get a better job and where? Your husband will have better employment around the latter part of April or first of May. You will make the change that he is contemplating.

A.S. Will I carry out the plan I have in mind? Don't be too hasty in applying for a divorce. I would like to help you with your problem if you will send in five questions.

X.Y.Z. Will my finances ever be better than they are now? You have gone through your darkest days. There is an up-trend in your financial condition after July 15.

DIMPLES. Will I ever marry my present boy friend? Yes, there is marriage for you with this young man that you have in mind, when he receives his furlough.

R.S. Should I sell the building I have in mind? It isn't a very good business investment so I wouldn't advise you to keep it. Do not try to dispose of it at this time as you would take quite a financial loss.

MRS. C.W. Will my husband have to go to war? Your husband will be called into military action within the next three months.

E.B. Where did my husband lose the diamond and emblem? The impression comes to me that this emblem was lost in the hallway of a large office building. I am very sorry, but I do not see that it will be recovered.

C.H.S. Will my husband and I ever own a farm? Yes, you will. Just at the edge of town.

R.W.W. Will you please tell me if my husband will be drafted? Yes, he will be called into the service by the latter part of June.

B.J. Who took my two turkey hens? They were picked up by a passing out of states truck.

LOU. I would like to know when the girl I stay with will hear from the man she wrote to. She seems to have written this letter during the latter part of the fall. I do not see any regular correspondence going on between this couple but she may receive one more letter from him within the next two months.

M.P.L. How many more children are we going to have? There will be one more.

C.G. How soon will we sell our home? You may not dispose of this home for another 14 to 16 months.

R.J.O. Where can I find out what is causing the pain in my chest? I would advise you to make a trip to the university hospital at St. Paul, Minnesota, and go through the clinic and you will get the correct diagnosis of your trouble.

BLUE EYES. Has my husband any other trouble? I do not see any trouble other than a rupture.

P.B. Is my married life going to be happy? It will be if you learn to control your temper and jealous disposition.

Our doctrine of equality and liberty and humanity comes from our belief in the brotherhood of man, through the fatherhood of God. —Calvin Coolidge.

Whoever in prayer can say, "Our Father," acknowledges and should feel the brotherhood of the whole race of mankind. —Tryon Edwards.

Jesus throws down the dividing prejudices of nationality, and teaches universal love, without distinction of race, merit, or rank. —Celtic.

MASTER GARDENER

I know that increased living costs are putting a few more gray hairs in many a head, and I also know that a considerable amount of time has been spent by many home owners in "tearing the Budget."

But I urge you above all not to eliminate the regular spring application of complete balanced plant food to your garden. Just as the sensible individual makes food and shelter his first concern, just so does the thinking gardener provide food for his plants above all other expenditures. This is one expenditure for the upkeep of the home where it is not prudent to be penny-wise and pound-foolish. An ample supply of plant food is so essential to the continued health and beauty of permanent plantings of lawns, shrubs, trees and perennial flowers. Your landscaping represents quite a substantial investment which the wise home owner will protect.

Apply plant food to established lawns because: Regularly fed grass is capable of preventing the inroads of weeds; is better able to withstand the extreme heat of summer weather; is less susceptible to injury from attacks of disease.

Apply plant food to establish perennial beds and borders because: An available supply of plant food keeps perennials healthy and promotes abundant bloom; also builds up enough reserves of food material in roots to bring plants uninjured thru the winter months.

Apply plant food to establish shrubs because: Feeding promotes healthy, thick foliage, and more and better bloom.

Apply plant food to established trees because: Proper feeding is of major importance in maintaining a tree in vigorous condition. Many of the rots and other diseases to which trees are subject, attack trees that have been weakened as a result of starvation. It is much easier to keep a tree in a healthy condition by proper feeding than it is to attempt to cure troubles after they come.

When planting annual flowers and vegetables, too, you will get better yields and higher quality if you will apply a complete balanced plant food when preparing the soil for planting.

LEAVES FOR POST

Lieut. George H. Ehlen is leaving this week for Camp Wolters, Texas where he will report for active duty on March 3. Mrs. Ehlen (Carolyn Saathoff) and her son, Roger will close their Chicago apartment and remain with her parents, the William H. Saathoffs, until Lt. Ehlen is assigned to a permanent post and quarters are secured for them.

William Zahnle, 1342 East avenue, is a patient at the Highland Park hospital, suffering from muscle injuries in his right leg, suffered when he was caught between a coal truck and an unloader at the Mutual Coal company last Tuesday.

rocker KITCHEN CLINIC prepared for Your Newspaper by Betty Crocker Home Service Department

IT'S THE SPIRIT THAT COUNTS When you hear lectures about civilian morale—do you ever stop to think that as a homemaker you are responsible for much of that morale? I mean that if you take the inconveniences and sacrifices of this wartime emergency with a smile—and accept it as a sort of challenge to do a good job by your family anyhow—you'll see the whole family reflecting your attitude.

A British woman wrote me that she and her friends regarded it as a test of their skill to see what good meals they could contrive on their weekly rations of food—amounts which would look just about hopeless to most American homemakers. Yet there were these English women cheerfully telling each other all their new discoveries for making tasty, nourishing meals out of the scrumpy amounts of food allotted them.

A Cheerful Dinner Helps So make your family meals as happy and gay as you can. And during this week of Washington's birthday when the traditional cherries are still much in evidence, remind your families of George Washington's courage and heroism when you serve them a colorful and delicious cherry carnival dessert.

In Keeping With Our Times It's a truly practical old-fashioned type of dessert—a light fluffy cake foundation filled with cherries and nuts and dressed up with a clear cherry red sauce. Yes, it's nice enough for a company dessert or for afternoon or evening refreshments. It stays moist and delicious and fruity tasting if you want to save part of it—and serve it later as a regular cake with a simple icing over the top.

Best of all it's a dessert you can adapt to these emergency times by using very, very little sugar in it. Here is the recipe with the changes indicated: CHERRY CARNIVAL DESSERT 1/2 cup shortening 1 1/2 cups sugar—OR 1/4 CUP SUGAR PLUS 1 CUP LIGHT CORN SYRUP 2 eggs 2 1/2 cups sifted all-purpose flour 1 1/2 tsp. baking powder 1/2 tsp. soda 1/2 tsp. salt 1 cup milk if all sugar is used—OR 1/4 CUP MILK IF CORN SYRUP IS USED FOR PART OF THE SUGAR 2 to 2 1/2 cups pitted well drained sour cherries (1 No. 2 can) 1/2 cup chopped nuts Hot Cherry Sauce

Cream shortening, add sugar gradually and cream until fluffy. If part corn syrup is used—cream the 1/4 cup sugar into the shortening first. Then beat the corn syrup into the creamed mixture. Blend in the well-beaten eggs. Sift the flour, baking powder, soda and salt together and stir into the creamed mixture alternately with the milk (remember it's only 1/4 cup milk if you're using corn syrup for part of the sugar). Blend in well-drained cherries and nuts. Pour into a well-greased and floured baking pan 8x12 inches. Bake about 50 minutes in a moderate oven, 350° F. Serve warm.

Don't Be Disturbed If Cherries Do Sink To The Bottom This will not interfere with the deliciousness of this dessert. HOT CHERRY SAUCE Mix together 1/2 cup sugar or 1/4 CUP LIGHT CORN SYRUP, a dash of salt, and 2 tsp. cornstarch. Blend in 1/2 cup juice from the cherries and 1 cup of water (OR ONLY 1/4 CUP WATER IF CORN SYRUP IS USED). Boil until mixture thickens and the starch taste disappears—about 10 minutes, stirring constantly until mixture boils—boil only occasionally after that. Remove from heat and blend in 1/2 tsp. almond flavoring. This makes 6 generous servings.

Report of A Lecture On Christian Science

Violet KerSeymer of Boston, Mass. delivered a lecture on Christian Science, Monday evening at the Elm Place school auditorium. She spoke substantially as follows:

Many of us long to know how to interpret life; how to escape from sickness and sin, confusion, distress; how to surmount obstacles; how to see beyond slavery to liberty. We want to make the highest and happiest use of life for ourselves and others. Christian Science enables every zealous student to achieve this. It is not a beautiful theory to be blindly adopted. It is the Science of Christianity to be intelligently practiced.

Synonyms for Deity In the Bible, God is referred to as Spirit, Mind, Truth, Love. Other synonyms for Deity also used throughout the writings of Mary Baker Eddy are Life, Soul, divine Principle. These synonyms, which form the basis for absolutely true thinking, unfold to humanity the immutable power of God, good. As a result, thousands of individuals, spiritually awakened, morally regenerated physically healed, are leading useful and happy lives.

The Bible and the Christian Science Textbook Mrs. Eddy's chief work, "Science and Health with Key to the Scriptures," published over sixty-six years ago, blesses every home and heart into which it is welcomed. Its author writes (p. 110) that, in the footsteps she took in her search for scientific revelation, the Bible was her only textbook. Every student of Science and Health gains fresh inspiration and practical benefit from his daily study of the Bible.

Insanity Healed Christian Science engenders the real humility which acknowledges one perfect first cause and effect and deals with difficult human situations from this immutable basis.

A Christian Science practitioner was called to help a young girl who had been insane for about two years. At first, violence and incessant incoherent chattering were in evidence. The young girl seemed gripped by fear and mental anguish. Gradually these distressing conditions subsided, and there were more frequent periods of restful sleep. At the end of a few weeks, the girl returned home, perfectly healed by the power of divine Mind. Her healing came about through the steadfast realization that God, divine Mind, is the only real Mind, and that man is the externally intelligent idea of the one divine Mind. The intelligence of man in God's likeness is invariable.

The Supremacy of Good In her work, "The First Church of Christ, Scientist, and Miscellany," pages 278 and 279, Mrs. Eddy writes: "The Principle of all power is God, and God is love... God is Father, infinite, and this great truth, when understood in its divine metaphysics, will establish the brotherhood of man, end wars, and demonstrate 'on earth peace, good will toward men.'"

90 Percent of Red Cross Fund Raised

With only 10 per cent of their \$3,750,000 quota remaining to be raised, workers in Chicago's Red Cross War Fund campaign this week (starting March 1) were concentrating on clearing subscriptions from smaller companies and their employees in an effort to bring the drive to a successful conclusion before March 15.

More than 1,500 of approximately 5,000 business and industrial concerns throughout the three-county areas covered by the Chicago Red Cross chapter have not yet returned pledge cards which were distributed by workers in the Industrial Division of the campaign, James B. Forgan, general chairman said. These are being counted on for a substantial portion of the balance needed since most of the potentially large contributions already have been received, he pointed out, and made a plea that everything possible be done to expedite transmitting these to the War Fund headquarters at 105 South LaSalle Street.

"There has been a noticeable increase in subscriptions of this type during the past week," Mr. Forgan said, "and we have been extremely happy to find that, in most cases, the level of giving has been at the level necessary to put this drive over the top. Company contributions have been for the most part at least equal to those made to the Community Fund and a majority of employees have given an amount equal to a full day's pay 'for those who are fighting.' If this continues for another week, our goal will be in sight and with other outstanding subscriptions, our \$3,750,000 will be virtually assured."

The official total of all contributions to the drive to date Mr. Forgan reported, is \$3,382,520.

Tricks for Making Autos Last Longer

A question often raised today is "How can I make my car last longer?"

As an adequate answer to that question includes methods for saving tires, gasoline and motor oil, the following suggestions by the Illinois Automobile Club are especially significant to motorists.

(1) Poor engine lubrication—wastes power and fuel; (2) Poor chassis lubrication—causes friction, wear and power loss; (3) Electrical system—condition of battery, connections, etc., affords engine efficiency and fuel economy; (4) Worn, dirty spark plugs—can waste one gallon of gasoline in ten; (5) Leaky fuel lines—occasional inspection may prevent needless waste; (6) Dirty carburetor—prevents proper mixture for efficient combustion, thus fewer miles per gallon; (7) Cooling system—correct temperature essential to good gasoline mileage; (8) Octane selector—must be adjusted to fit type of fuel in use; (9) Under-inflated tires—make car harder to move, increasing all wear; (10) Slipping clutch—dissipates power; (11) "Show Off" acceleration—can increase fuel consumption 50 per cent and shortens tire life; (12) Low gear driving—fewer miles per gallon; (13) Starter overuse—uselessly pumps gasoline and impairs lubrication; (14) Filling tank too full—warm gasoline expands and may spill out through filler cap.

"Since the curtailing of new automobiles, conservation of existing cars has become imperative," says Carl A. Barrett, President of the Club. "This not only will save materials vital to the war effort but will enable individual motorists to do more efficiently the extra tasks demanded of them by the emergency."

The Woman's guild of St. Paul's church is meeting at 2 o'clock this afternoon with Mrs. F. G. Piepenbork as hostess. Mrs. Henry Scheskie, Sr. will act as assisting hostess.

NURSES NEEDED FOR RED CROSS HOME NURSING

With 15,000 women already under instruction in Red Cross Home Nursing, the Chicago Chapter of the Red Cross is making arrangements to increase this total as rapidly as possible.

Mrs. Estelle Weltman Blatt, Director of Home Nursing for the Chicago Chapter, has announced the following procedure for those interested in taking the course:

Twenty-five persons are required as a group for instruction. The group can be formed through application to the nearest Park District Field House, P.T.A., Club Group, or Church. A Red Cross Home Nursing instructor will then be appointed by the Red Cross, provided arrangements have been made for a time and place for the group to meet. The standard course requires 24 hours of instruction.

The demand for Home Nursing instruction has risen very greatly since the start of the war and the increase in Civilian defense activity. Consisting of simple methods for the care of the sick and health protection in the home, the course has become more necessary with the large numbers of doctors and nurses going into the armed forces.

More than 400 graduate nurses have volunteered their services as Home Nursing instructors, and more are urgently needed by the Red Cross.

Dr. Gerald Wendt Evanston Town Hall Speaker

Dr. Gerald Wendt, foremost interpreter of Science, Director of Science and Education at the New York World's Fair, author of "Science for the World of Tomorrow," will present a demonstration lecture "The Challenge of Science" as the final lecture of the Evanston Town Hall public lecture series, at Cahn Auditorium, Scott Hall, Evanston, on Friday, March 13, at 8:15 P.M.

As former editor of "Chemical Reviews," contributor to many other scientific journals and research consultant for several leading industrial concerns, Dr. Wendt has been in close touch with the development in the whole field of science for more than a quarter of a century.

After receiving his A. B., M. A. and Ph.D. degrees from Harvard, he travelled extensively in Europe visiting several times the great scientific research centers of Germany, England, France, Switzerland, Yugoslavia, Hungary and Turkey.

Dr. Wendt served in the Chemical Warfare Division of the World War I. He points out that the Japs and the Nazis have no monopoly on big surprises and that some of World War II's most startling developments are apt to come, new and unheard of weapons and defenses, and that scientific research will confront the enemy with far greater surprises than Pearl Harbor and Norway, aided by our three great weapons, raw materials, man production and man power.

Dr. Wendt will discuss and demonstrate the function of science as a social force and he challenges fresh thought, not on science alone, but through science on business, economics, labor, and social conditions, war and politics, home and family, religion and morals.

Reservations for the lecture may be made through Mrs. Wesley W. Polk, director of Evanston Town Hall.

St. Mary's Cemetery Association To Meet March 8

There will be an open meeting of St. Mary's cemetery committee Sunday afternoon, March 8 at 3 o'clock at 117 Highland avenue at the Courte Arte Club rooms. All members are asked to be present as the financial report is to be read. There will be an election of officers.
