

**REPORT OF CHRISTIAN SCIENCE LESSON-SERMON**

"Man" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, March 8th.

The Golden Text was, "Have we not all one father? hath not one God created us?" (Mal. 2:10)

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "And God said, Let us make man in our image, after our likeness: . . . So God created man in his own image, in the image of God created he him; male and female created he them" (Genesis 1: 26 to 27).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Man, in the likeness of his Maker, reflects the central light of being, the invisible God. As there is no corporeality in the mirrored form, which is but a reflection, so man, like all things real, reflects God, his divine Principle, not in a mortal body" (p. 305).

**Did You Know That**

Your Community Center has a number of features that any Highland Park can use and enjoy?

- (1) Craft Shop with all tools, power machines, etc. A two-dollar membership gives adults an opportunity to use these facilities. Now members may use it for a 25-cent service fee.
- (2) Community Dark Room. This is available for photograph fans for a 25-cent service charge.
- (3) Squash or handball court, open to all for a 25-cent service charge.
- (4) Table Tennis Club is an activity meeting on Monday evenings and open to all. There is a small club fee.
- (5) Chess Club. A group of interested chess players who invite any Highland Park to come and play with them. Beginners are welcome.

Fred Selig will observe his eighty-seventh birthday, Tuesday. He is the father of Mrs. Peter J. Juhrend, and Mrs. Clifford Hammer, Deerfield; Virgil Selig, Highwood and William Selig, Chicago.

**Jim Bowden In School Play**

Jim Bowden, son of Mr. and Mrs. George Bowden, 625 Central Ave., will play the role of Abbot Jonquil in the all male cast of Leo Brady's Brother Orchid, the forthcoming production of the St. Benedict's college dramatic club, Atchison, Kan. The play will be under the direction of the Rev. Bede Bradley, O. S. B., head of the speech department of the college, and will take place in the college's "little theatre," March 9.

Bowden, a graduate of St. George high school, is vice-president of the sophomore class, a columnist on the college newspaper, "The Rambler," and a member of the class basketball team.

**Cooks-Bakers Needed At Naval Training Station**

The Navy needs men who feed the men who feed the guns.

Lieutenant Commander O. A. Dole, commissary officer of the U. S. Naval Training Station at Great Lakes said today that about 600 experienced cooks and bakers would be needed here by the time the training program reaches its peak within the next few months.

Cooks with five years or more of restaurant or hotel experience will be given ratings ranging from third class, which pays \$60 a month and subsistence. Bakers with all-round experience are wanted, the Navy officer said, and will be given ratings similar to those offered cooks.

"One thing for qualified men of military age to consider," Lieut. Cmdr. Dole said, "is that they will remain in their chosen field throughout the war and will be given an opportunity to increase their skill by working with the most modern equipment."

Cooks and bakers living in the vicinity of the naval training station at Great Lakes who are interested in enlisting in the Navy or Naval Reserve should come to the commissary department on the station for interviews with Lieut. Cmdr. Dole. For others, full details are available at any Navy recruiting station.

**THE MASTER GARDENER**

**When Does Blue Grass Make Its Best Growth and How Does This Influence Time of Feeding?**

Extended experiments by the United States Department of Agriculture, in cooperation with the Missouri Experiment Station, have shown that Kentucky Blue Grass makes its best growth above ground at an air temperature of 40 degrees F., but top growth will continue up to 90 degrees F.

The roots present still a different story. They grow best at a soil temperature of 60 degrees and stop growing at 80 degrees F.

The above data explains the summer "dormancy" of Blue Grass.

These figures also explain why lawns should be fed early in the spring. Get the plant food into the soil so that it will be available to the grass at the time when both roots and top make their best growth. Not only temperature but also moisture conditions are most favorable to the growth of grass in the early spring.

Through early feeding you can develop a dense weed-free turf with a deep extensive root system that will carry the grass right thru the growing season in excellent condition.

Apply a complete balanced plant food for best results. If application is made while the grass is still dormant, it is not necessary to water the plant food in. An application of 4 lbs. of complete balanced plant food per 100 square feet of lawn area will constitute a square meal for your grass.

**Nutritional Value of Vegetables Increased thru Proper Feeding of the Vegetable Garden**

The amounts of proteins, sugars, the valuable mineral constituents of the plant, and the content of vitamins can be increased in plants by applying the proper plant foods to the soil. All of these have a bearing upon the real value of plants as food.

In connection with the National Nutrition program, attention is being called to the needs of calcium, phosphorus, iron, magnesium, and other minerals and nitrogen in human nutrition. The application of plant foods including these elements increases the amounts carried by garden plants and other crops.

In order to be sure that every element that a plant requires is supplied to vegetables, something more than the usual three-element plant food should be supplied to the vegetable garden. Most plant food products will provide nitrogen, phosphorus and potassium, but only a complete scientifically prepared plant food will provide all of the eleven elements secured from the soil which are so very important in the proper feeding of all plants, particularly vegetables.

Increased palatability or quality is another excellent reason why plant food should be used liberally on vegetables. It is well known that slow growth in any of the greens or root plants results in poor quality. The plants grown for their leafy parts become tough, bitter, and wilted when starved, while the root plants become woody and strong in flavor when poor growth is made due to lack of plant food. Furnishing an abundance of the right plant food in the soil gives vegetables increased tenderness, color and flavor.

A general rule to follow in applying plant food to the vegetable garden is to scatter four pounds per 100 square feet evenly over the newly prepared seed bed and work it into the top few inches of soil, before the seed is planted or plants are set out.

Or, if vegetables are grown in rows, use two pounds of plant food for each 50 feet of row. When the soil is prepared, apply the plant food in a strip approximately 6 inches wide, then rake it into the top soil before planting the seed.

For vegetables grown in hills or transplanted, mix a level tablespoonful of plant food thoroughly with soil in bottom of hill and cover with one inch of soil before seeding or setting out plants.

**GOVERNOR GREEN PROCLAIMS NATIONAL FLOWER SHOW WEEK**

Left to right, James Sykora and Alec Henderson, co-chairmen of the National Flower and Garden Show, watch Governor Dwight H. Green sign the "National Flower Show" proclamation.

"National Flower and Garden Show Week" was proclaimed by Governor Dwight H. Green in recognition of the importance of the Twenty-third National Flower and Garden Show to be held at the International Amphitheatre March 15 to 22.

James Sykora and Alec Henderson, co-chairmen of the Flower Show, conferred with the governor on the gardens for victory and flowers for morale. The show will feature five victory gardens in the Amateur Section.

Chicago and surrounding communities are displaying the greatest interest ever shown in a flower show, as evidenced by the large number of advance sale tickets sold this year, according to Robert H. Roland, general manager of the show. More than 100,000 advance sale tickets have been distributed among 600 florists, stores, women's clubs and garden clubs.

The show will feature twelve major exhibits on the main floor of the Amphitheatre, each large enough to warrant a star billing as a major attraction.

Recently added to the panorama of beauty and glamor is an orchid display by Andrew Benson of Des Plaines, one of America's outstanding growers and hybridizers of the exotic flower. This spectacular orchid display will be in the north wing, which will also house the feature exhibit of the Czechoslovakian Garden Club—a beautiful reproduction of the Castle of Hradchany overlooking the ancient city of Prague.

A panel of green lawn, bordered on either side by wide beds of tall giant tulips, in brilliant colors, will provide the prelude to spring. June, the month of roses, will be portrayed in a huge outdoor rose garden, featuring four great "V's" of brilliantly colored roses.

Herb gardens, outdoor fireplaces,

naturalistic gardens, and formal ones will be created by leading landscape architects within the Chicago area. Thousands of roses, carnations, snapdragons, stocks and other leading seasonal flowers, in huge color masses, will vie for some twenty thousand dollars in cash prizes. Rare and special flowers and plants will be rushed to the show by fast express and plane.

Over two hundred organizations are represented in the Amateur Section, according to Mr. Roland. Educational displays will be featured by the University of Illinois and the Ohio State University. Six universities are sending students to take part in the flower judging contests. The British-American Ambulance and the American Red Cross will have special booths at the show.

Many thousands of school children will attend in class groups. Garden and high school classes, as well as junior garden clubs, have taken keen interest in entries in the special Junior Section.

"The whole purpose of the show is educational. The plan for the show," Mr. Roland explained, "follows that of the famous shows of Great Britain, wherein the finest of plants and flowers by growers compete in the major classes. The ingenuity of the flower lover and the amateur horticulturist finds a happy means of expression in the gardens, shadow boxes, table decorations and other exhibits of the Amateur Section."

The show opens its doors at 2 p. m. Sunday, March 15, and runs for eight days, opening daily at 10 a. m. to 10 p. m. Ample parking space is provided for those who drive cars to the show. The show, largest indoor flower show in America, is expected to attract visitors from a radius of five hundred miles. The value of the plants and flowers on display is expected to be approximately a million dollars.

**About the appliances we advertise nowadays**

The appliances we are now advertising are limited to those we have on hand, or those that are made available without interference with war production. They have all been selected because their normal operation in the home comes at a time of day when our electrical facilities are more than adequate to meet present power requirements for both war production and civilian use. Furthermore, we believe that their use in most cases will conserve energy and tend to release home labor for helpful wartime activities.

**Pardon Mr. Burton for bragging . . . about his new, dependable Electric water heater**

"Right out of bed and under a warm shower! No monkeying with any old-fashioned hot water devices, either. Believe me, this is the way to start the day right . . . I can keep my mind on important things!"

"By evening, my wife has done plenty of extra work these days . . . so the least I can do is get modern equipment for her. Our electric water heater gives her hot water whenever she needs it—just by turning the tap."

"Look at that! A whole month of hot water convenience, and our electric service bill shows it cost only a few cents a day on the 1 cent rate! Why in the world didn't we install an electric water heater long ago?"

**Hot water always on tap . . . at low cost**

You can't blame Mr. Burton for bragging. His Electric Water Heater means a lot to him, and to his family. They all save time and energy for more important things, while their water heater continues to supply plenty of hot water for all uses, at a very small cost.

Come in now . . . see for yourself how you can make your home a better place to live, with a new Electric Water Heater!

Other dealers are also offering good values in Automatic Electric Water Heaters

**PUBLIC SERVICE COMPANY of Northern Illinois**

**Rectenwald Brothers Meet In Uniform**

Private William Rectenwald, son of Mr. and Mrs. Wm. Rectenwald, 810 South Ridge Road, spent two days at home last week, with his parents and his sister Ruth. Private William joined the Army forces in November and is now at Fort Leonard Wood, Missouri in the Engineering Corps. He expects to be transferred soon.

Raymond Rectenwald, Private William's brother, enlisted in December in the Naval Reserve for the duration, and is now at the U. S. Naval Training Station, Great Lakes, Illinois. Raymond is now in Service School at Great Lakes for the month of March, and then expects to go to school again for two or three months in Dearborn, Michigan.

Raymond had seen his brother William in his Army uniform, but William had not seen Raymond in his Navy uniform. This past Wednesday, the brothers met again when Private William visited Raymond at Great Lakes. This time both of them being in uniform and each giving the other "the once over."

**Poet Laureate Contest Closes March Fifteenth**

Unknown poets will have the same chance as professionals to win in America's Poet-Laureate contest, as names will be removed from all entries before being judged, Claude B. Coldren, committee chairman, announced this week.

New awards—in response to many requests from schools and colleges—include a college division, junior college, high school and junior high school division.

First, second and third place will be named in each of these divisions, and all entries will be considered in the general division.

Entries should be mailed immediately as the contest will close March 15. Ten cents should be enclosed to defray clerical and postage costs. Poems should be mailed to H. M. Hudson, Secretary, Poet-Laureate Committee, Broadway Building, San Diego, California.

**Some of the Services available to our Customers:**

- (1) Defense Bonds and Stamps
- (2) 2% on Time Deposits
- (3) Checking Accts.—no minimum balance requirement
- (4) Money Orders—at Post office rates
- (5) Traveler Checks
- (6) Safety Boxes \$2.00 per year and up
- (7) Home loans, car loans and other loans
- (8) Xmas Savings Club Accts.
- (9) Accumulative Savings Accounts — Deerfield, Illinois —

**Deerfield State Bank**  
Member Federal Deposit Insurance Corporation
