

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

Consolidated Features.—WNU Release.

NEW YORK.—Harold McCracken, explorer for the American Museum of Natural History, says Japanese in the Aleutians are just like Germans in Florida, and Must Be Bayoneted he says further more that we can't bomb them out. They can hole up like gophers in the native huts, and in Mr. McCracken's view must be "chased with bayonets into the Bering sea," if we are to dislodge them at all.

This should qualify as expert testimony. Mr. McCracken knows the Aleutians. In July, 1928, heading the Stoll-McCracken expedition, he unearthed a sarcophagus, on top of an almost inaccessible Aleutian rock islet, containing the mummies of three adults and a child. This culminated his 11-year search for stone age remains along the Aleutian land-bridge.

As an archeologist and explorer, the author of a number of books, he has studiously pieced out the historic jig-saw puzzle of his various findings and taken due account of their bearing on war and peace and the present and future of mankind. In 1934, he elaborated a plan for an "international grand jury" to end war which, in some aspects, was the first of several suggestions for using individual interests, across national boundaries, rather than grouping sovereign nations. More pertinent to his current observation is his previous conclusion that the Japanese invasion of the Aleutians was long planned and carefully prepared.

Mr. McCracken, a lean, gentle man with horn-rimmed spectacles, doesn't look like a man who has killed about 20 Kodiak grizzly bears, but he has, and such encounters are a minor detail of his desperate adventures in shipwrecks, blizzards and lonely treks in the frozen wilderness.

It was in 1915 that he first went to Alaska, heading an expedition for Ohio State university, his alma mater. In 1919 and 1920, he placed pay dirt on the Alaska peninsula, and into 1922-23 headed up a moving picture expedition, again for Ohio State university, to film big game. This led him into the production of travel and documentary films.

ONE of our first stories, as a beginning reporter in Chicago, was a rock and sock fight between some Jugoslavs and another Balkan group, down around the Mihhailovitch Hegewisch steel mills. The Jugoslavs were outnumbered but they won.

They were more versatile than the opposition, better in knee and elbow work, and could land a chunk of slag or a slug of pig-iron on an exposed skull with skill and authority. Their own skulls seemed strangely resistant to such missiles.

As to the fight, they seemed to enjoy it, and when it was over, set up a patriotic song which ranged far over the slag heaps and far into the night. It would be nice to recall that the defeated challengers were Italians, but they weren't and that good news has been held for another day.

The Jugoslav guerrillas, 16 battalions of them, are chasing the Italians out of the former province of Bosnia. At the time of the Axis attack on Jugoslavia, we recalled that Hegewisch battle and would have made a bet with any taker that something like that would happen. In the above and other encounters we have noted that in fighting the Jugoslavs seem to have their mind on their work more than any other combatants. And, again, they seem to enjoy it.

His flaring black mountaineer's mustache has become a gonfalon of hope to those who want to believe that victory may be won by a stout heart and not necessarily by the biggest tanks. It is reported that 3,000 Italians have been captured or killed in the last two weeks and that the general's forces have now wrested 11,000 square miles from the Axis. They didn't try to make their second front a jug-handled deal.

The rocky-faced General Mihhailovitch, a colonel of artillery several years before the war, came out of the First World war with a strong distaste for the German military blique.

When the blitzkrieg hit, he was invited to join officials and army leaders in a plane flight to Cairo. He said he had another engagement, went back to the mountains and emerged with a few hundred of his hard-rock boys, started savage forays and later worked them into carefully planned and operated military actions.

THE NECESSARY KEYSTONE

What's Doing In Deerfield

A three-day carnival will be sponsored by the Deerfield American Legion and its auxiliary over the Labor Day week-end, Sept. 5, 6 and 7.

Entering the College of Wooster at Wooster, Ohio, as a freshman this year will be Miss Dorothy Peck, daughter of Mr. and Mrs. Franklyn Peck of Hillcrest rd.

Mr. and Mrs. Harry E. Wing and daughter, Shirley, are vacationing at their summer home at Glen Lake, Mich. Shirley will enter the University of Wisconsin as a freshman in the fall.

A meeting was held last Thursday evening at the village offices in the Masonic temple of the Deerfield Junior Commandos and members of the salvage committee of Deerfield. The boys and girls were given their instructions in the salvage campaign and received arm bands designating their rank.

Deerfield chapter of the Eastern Star will meet tonight (Thursday) in the Masonic temple.

Mr. and Mrs. Lyle Fordham are visiting Mr. Fordham's father in Green Lake, Wis.

Vacationing in Wisconsin are Mr. and Mrs. Vernon Giss.

Hostess to members of the Wilmette Eastern Star Sewing club last Thursday was Mrs. W. T. Churchill of Greenwood ave.

A Victory Garden supper was given by Mrs. J. R. Notz last Tuesday evening. Nine teachers from Norwood Park Grammar school, where Mrs. Notz is a teacher, were present.

Mr. and Mrs. Kenneth Weir are visiting Mrs. Weir's parents, Mr. and Mrs. E. A. Comer, and her sisters, Mrs. Carl T. Blair and Miss Mary Comer in Union, Ia.

Miss Dorothy Utpadel, daughter of Mr. and Mrs. Charles Utpadel of Wheeling, Ill., and John Engstrom, son of Mr. and Mrs. George Engstrom of Central ave., were married Aug. 8, at Boston, Mass. Mr. Engstrom is on the staff of the Massachusetts Institute of Technology.

Richard M. Vant will celebrate his 83rd birthday on Tues., Aug. 25. Due to the fact that Mr. Vant has been ill, only members of the family will be present.

Constance Koebin, Bernice Ann Flanagan and Rose Marie Barrett are returning home from the National Music camp at Interlochen, Mich., this week. They are students at the Highland Park high school.

Last week Mr. and Mrs. Warren Brown of Marengo spent several days with Postmaster and Mrs. John J. Welch. Mrs. Brown and Mr. Welch are sister and brother.

Moving from Evanston to Highland Park next month will be Mr. and Mrs. John Zenko. Mrs. Zenko, the former Gertrude Johnson, is the daughter of Mr. and Mrs. A. J. Johnson of Deerfield rd.

A meeting of the teachers of Deerfield Grammar school will be held Wednesday, Sept. 9. The school will open for the fall session on Thursday, Sept. 10.

Mr. and Mrs. Arthur Merner and Miss Ruth Johnson are visiting the Merners sons, Richard and Milton in New York. Richard is at Niagara Falls and Milton at Syracuse. Miss Johnson is Milton's fiancée.

Mrs. Leslie Christensen is in charge of the buffet supper to be given tonight (Thursday) by members of the Bethlehem Woman's auxiliary at the church.

Virjean Tesch of Arlington Heights has been visiting her cousin, Patty Dobbins of Elm st.

Teaching school this year in New Orleans will be Miss Elizabeth Warner, who has taught the fifth grade in the Deerfield grammar school for the past two years.

A pet show was given last week by Dorothy, Carol and Charlotte Jacobson, daughters of the E. G. Jacobsons of Sunset ct.

James O'Connor, 11-year-old son of Mr. and Mrs. Frank O'Connor of Deerfield rd., broke his wrist last week, and Charles Kilcoyne, 10, son of James Kilcoyne of Osterman ave., cut his knee on a broken bottle while playing.

Mr. and Mrs. A. L. Renning of Brand In. observed their 54th wedding anniversary on August 15. It was also the 77th birthday anniversary of Mr. Renning. The Rennings have two children, Mrs. Leslie Brand of Highland Park and Albert Renning of Chicago, and three grandchildren.

Visiting Mrs. John Grootmont in Appleton, Wis., are her daughter Mrs. G. Albert Willen and her two grandsons, John and Paul Willen.

Planning to attend Ripon college in Wisconsin this year is John Fordham, son of the Lyle Fordhams of Osterman ave.

Bernice M. Lehts Weds On Saturday

Miss Bernice Marie Lehts, daughter of Mr. and Mrs. Iver Lehts of Ironwood, Mich., will be married to Joseph Notagiaco, son of Mr. and Mrs. Lee Notagiaco, of 234 Jeffreys pl., Highland Park, Saturday, Aug. 22, at St. James church, Highwood.

CHRISTIAN SCIENCE CHURCHES

"Soul" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, August 16.

The Golden Text was, "My soul shall be joyful in the Lord: it shall rejoice in his salvation" (Psalms 38: 9).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "If ye walk in my statutes, and keep my commandments, and do them; Then I will give you rain in due season, and the land shall yield her increase, and the trees of the field shall yield their fruit. And I will walk among you, and will be your God, and ye shall be my people" (Lev. 26: 3, 4, 12).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Nothing but Spirit, Soul, can evolve Life, for Spirit is more than all else. Because Soul is immortal, it does not exist in mortality. Soul must be incorporated to be Spirit, for Spirit is not finite. Only by losing the false sense of Soul can we gain the eternal unfolding of Life as immortality brought to light" (p. 335).

CHURCH SERVICES

HIGHLAND PARK

REDEEMER LUTHERAN West Central Avenue Rev. H. K. Fisher, pastor 46 No. Green Bay Road Phone H. P. 260 THURSDAY, August 20 8:30 p.m. Junior Young People's Society singing to Wauconda. Meet at church. Daughter Born To Heintz

A daughter was born to Mr. and Mrs. Frederick Heintz of Deerfield on Wednesday, Aug. 19, at the Evanston hospital. Mrs. Heintz is the former Elizabeth Flinn, daughter of Mr. and Mrs. Raymond Flinn of Highland Park.

School's Wartime Problems to Be Studied At N. U.

More than 3,100 students began their vacations on Saturday, August 15, when the eight week session of Northwestern university's largest summer session in history officially closed. About 2,500 students enrolled in the eleven week quarter, which was offered for the first time this year, will remain until September 5. Unusual seriousness of purpose on the part of students accelerating their education because of the war is evident in this year's session, Dr. Rollin

B. Posey, director, said. Almost 800 students completed their work for degrees this summer. Although there was no formal commencement program, graduates were honored at a convocation last week, and will receive their diplomas by mail. A special three week intercession is being sponsored by the school of education for the first time will take up the problems facing the schools in wartime. The work will be organized around the needs of students with special attention to civilian defense, guidance of volunteer defense workers, guidance for defense jobs, and education for peace.

Science In The News

By ORSON D. MUNN, U.M.W. L.L.B., Sc.D. Editor, Scientific American

Priorities on metals of all kinds is a subject much in the news today, yet the restrictions imposed have been so far felt by the general public more in the way of complete restrictions on certain types of goods rather than by old familiar articles dressed up in new form. Yet it is just this matter of new dress for old articles that shapes up one of the most fascinating pictures of scientific research

Orson D. Munn

and development that has so far come out of our present difficulties. Our armed forces need metals—metals of all kinds, from aluminum to zinc. Many of the common articles of household and personal use have formerly been made of these same metals. In fact it seemed, when priorities were first imposed, that many of these same objects would have to be removed from the market. Some of them, indeed, did disappear, but others started to change shape or color, to feel differently than formerly—substitute or alternate materials were being brought into play in an endeavor to supply to the American public those necessities that were demanded, yet at the same time not interrupt the flow of critical materials to those industries which are supplying our war needs. And these substitutes, developed by the application of scientific research, often are just as good as or even better than the materials they replace. Probably one of the most outstanding developments of alternate materials as concerns the average man has been made by National Carbon Co., Inc. in the design of a new "Eveready" flashlight to meet the needs of the moment. Flashlights were hard hit by priorities, yet they are in even greater demand for civilian defense and other activities than they ever were in the past. Also, the armed forces themselves need flashlights. But formerly flashlights used quantities of copper, brass, nickel, aluminum, chromium, and steel in their construction, and the armed forces need these metals even more for other purposes than they do for lights. With all these factors in mind, engineers in the world's largest flashlight-and-battery laboratory decided to design an "Eveready" flashlight that could be manufactured in quantities without using needed metals. That they have succeeded is a tribute to the intelligent application of lessons that have been learned about substitute materials and how to use them. In the new flashlight, the case is made of five layers of jute and craft papers firmly bonded and coated with a plastic varnish that renders the tube water repellent. The bottom of the case, made to the smallest possible dimensions consistent with strength, is clinched in place, the head being removable for battery changing. The reflector of this new flashlight is made of a molded plastic, saving aluminum. The reflector surface is plated with a silver-like finish to maintain light efficiency. Altogether, the strategic non-ferrous metals have been cut to an irreducible minimum. Even the use of steel has been cut to the bone. Yet, tests show, the unit is simply strong for even the roughest type of service that it is likely to encounter. This is only one example of the many cases of substitute material use during wartime, but it is selected as outstanding because of the manner in which the designers and engineers went all the way in the use of substitutes, instead of trying to patch an old design with a bit of substitution here and a bit there.
