

WHO'S NEWS THIS WEEK

By LEMUEL F. PARTON

NEW YORK—Lieut. Gen. Bernard Law Montgomery, as commander of Britain's Eighth army, is in supreme command of Allied forces in Cal Coolidge's High Command...

He is known as a cautious, reticent officer, highly esteemed in Downing street, according to meager accounts available here...

In the years between the big wars, he was busy with staff work, said to be one of the keenest students of traditional warfare...

Born the son of the Rt. Rev. H. H. Montgomery, he entered the army in 1908, and fought through World War I as a battalion major.

AT THE Versailles Peace conference, a pretty Chinese girl, one of the secretaries of the Chinese delegation, made an earnest plea to A 'Mrs. Miniver'...

She was then the first and only Chinese woman to hold the degree doctor of laws, and is today Mme. Sourmay, Teheng Wei, wife of China's new ambassador to Washington...

She might be considered a Chinese Mrs. Miniver, who could discuss bombs from first-hand knowledge of an embassy tea party.

It was in the revolution that established the Chinese republic that this modish little lady was a bomb-toter. Her father was a high official of the Manchus government...

The annual Succoth service in which the adults and children of the congregation join will be celebrated on Sunday morning, Oct. 4, and will be the first of the regular Sunday morning services.

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "And he entered again into the synagogue; and there was a man there which had a withered hand."

Again, like the Miniver, Mme. Wei and her husband saw their home bombed piecemeal, and dodged behind trees and rocks in the woods to avoid the machine gun bullets of the Japanese bombers.

Text of Lecture On Christian Science Given By Judge Hill

A lecture on Christian Science entitled "Christian Science: The Law of God Demonstrating Substance and Supply," was given Friday evening at The First Church of Christ, Scientist, a Highland Park by Judge Frederick C. Hill, C.S.B., of Los Angeles, Calif.

The history of the human race is an unfolding record of mankind's endeavor to grasp the meaning of substance and supply and thereby acquire a sufficient amount of something to meet his needs and demands.

Religion has been an important factor in the affairs of mankind, and from canonical writings the fact is disclosed that substance and supply are to be found in the metal realm, and not in the material world.

Not doubt the masses were just as confused then as they are now. Instead of knowing and understanding what substance is, mankind has believed and accepted something—that life, substance, and intelligence are in matter.

The greatest event in human history occurred nineteen centuries ago, when a child was born in Bethlehem of Judea. About thirty years later, that child, now grown to manhood, appeared as a prophet, preaching the gospel, healing the sick, and laying the basis for the redemption of mankind.

Enter Christian Science About the middle of the nineteenth century, Mary Baker Eddy, through her clear, spiritual insight caught the import of Christ Jesus' profound saying, "I am come that they might have life, and that they might have it more abundantly."

Succoth Service To Be Observed At Temple

Succoth, the Festival of Tabernacles, commences on the evening of Friday, Sept. 25, and continues for eight days. On Saturday morning, September 26, at 10:30 o'clock, Rabbi Shulman will conduct a brief service at the North Shore Congregation Israel, Glencoe, marking the first day of the holiday.

The annual Succoth service in which the adults and children of the congregation join will be celebrated on Sunday morning, Oct. 4, and will be the first of the regular Sunday morning services.

CHRISTIAN SCIENCE CHURCHES

"Matter" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, September 20.

The Golden Text was: "What agreement hath the temple of God with idols? (II Cor. 6: 16). Among the citations which comprised the Lesson-Sermon was the following from the Bible: "And he entered again into the synagogue; and there was a man there which had a withered hand."

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "The understanding that the Ego is Mind, and that there is but one Mind or intelligence, begins at once to destroy the errors of mortal sense and to supply the truth of immortality."

City of Libertyville Originates Use of Scrap Depositories

With the need for scrap metal at the most critical stage since America entered the war, the salvage committee, Illinois State Council of Defense, has originated the use of scrap depositories as a means of spurring salvage of vital steel and iron.

The depositories, which it is hoped will eventually grace the main street of every city of 3,000 population and over in the state, received their baptism of scrap in Libertyville recently. Two red, white and blue crates were placed in the village square for test purposes.

Proceeds were to go to the U. S. O. and the Boy Scouts, who aided collections. Eisenberg originated the scrap depository plan.

Empty Four Times Before nightfall, the depositories had been emptied four times. Everything from toy train tracks to a large butcher's scale had been dropped into the crates.

The success of the venture in Libertyville led to immediate plans for its extension throughout the state. One such depository is envisioned for each 3,000 of population. Within the next ten days, an additional 100 communities will receive depositories from the State council. Each is asked to add others if they are needed.

New Claims Under Job Insurance Act Show 20% Decline

New claims for benefits under the Illinois Unemployment Compensation act were off 20 per cent in August compared with July, 1942, State Director of Labor Francis B. Murphy has announced.

"New claims received by the division of placement and unemployed compensation totaled 32,585 during August, 1942, and 40,905 during July," Director Murphy reported. "During August, 1941, 27,175 new claims were received."

"The amount paid out by the state in job insurance to eligible unemployed workers during the two months of the current year was 17 per cent less in August (\$4,180,630) than in July (\$5,053,968). Compared to August of last year, however, using which \$2,134,142 was paid in benefits the August, 1942, figure represents an increase of 96 per cent."

Since the beginning of the present benefit year last April 1, the number of eligible claimants and the value of benefits paid each month have been consistently in excess of those for the same months of last year.

Murphy listed three causes which he said would account for most of the increases: (1) liberalized benefit provisions adopted by the General Assembly at its last session, (2) unemployment resulting from the conversion of industry to war production, and (3) the fact that benefits are now being paid on the basis of wages received during 1941 whereas benefits were paid during the same months last year on workers' earnings during 1940.

Warn Motorists To Avoid Purchasing Blackout Equipment

Production of official blackout vehicle light devices in large quantities is scheduled for the near future; but until these are available, motorists must be careful to avoid purchasing equipment allegedly approved for blackouts but actually not so approved, according to the safety and traffic engineering department of the Chicago Motor club.

Charles M. Hayes, president of the Chicago Motor club, stated, "Research is being conducted to determine the most satisfactory method of blacking out or dimming illumination on cars which must move during the blackouts. At present, no one knows just what plan will be the accepted one. When the decision is reached, the official blackout headlight will be stamped: 'Blackout Headlamps—War Department Standards.' Only equipment which meets the war department's laboratory tests will be eligible for this marking."

Motorists are warned by the club that only emergency vehicles and the cars of selected persons working on highly important work will be permitted to move during air raids. Some confusion has resulted from the fact that many motorists, provided with home-made blackout headlamps, thought they could drive because they had partly blacked out their vehicles.

Infant Welfare to Meet Sept. 28

Monday, Sept. 28 Mrs. Raymond E. Lee, 205 Edgecliff Drive, will be hostess to the Highland Park - Ravinia Center of the Infant Welfare Society of Chicago.

Those who will assist Mrs. Lee as hostesses will be Mrs. Charles E. Brandriff, Mr. Philip E. Johnson, Mrs. James A. Daris, and Mrs. Oliver E. Weed.

North Shore Philatelic Society Meets Sept. 28

NORTH SHORE PHILATELIC SOCIETY has a special treat for those who attend its second September meeting the 28th at 8 o'clock. Walter Emerson, philatelist and philosopher, will talk on "The Proper Relationship Between Collector and Dealer." Those who have heard Mr. Emerson know what to expect. To others we can only say, come out and hear a speaker who will keep you in stitches the whole time he is talking. While Mr. Emerson is humorous he always gives his listeners some sound philosophy to take home and mull over. All visitors are most welcome.
