PUBLIC SERVICE Homemaker's Bureau

shows you how to get the most out of your present lighting

An advisory service to afford you greater benefit from your lamps and appliances.

Wash lamp bowls and clean bulbs with damp cloth frequently, to get from 25% to 30% more light from your lamps. Never place bulbs in water.

Lighten your shades. Dark shade linings are light robbers. A coat of white paint will turn parchment or metal lampshades into better reflectors; sometimes a damp cloth will clean such shades. Reline fabric shades with white or light material.

Avoid direct glare from lamp bulbs or bowls by using shades that are deep enough.

Make lamps do double duty. Two people can have plenty of good reading light from a single lamp, if the lamp is placed between them. Group your chairs around your lamps.

Six suggestions for better light ... better sight

Sit close enough to the lamp to get all the help it can give your eyes. A difference of a few inches may mean 50% less light on your task.

Use correct bulbs. Be sure to replace those burned out with correct size. Smaller or larger bulbs might not be as efficient. Check your needs at our Lamp Exchange counters.

There'll be a wide selection of lamps for your post-war home

Most lamp manufacturers nowadays are busy with war work. That's why there are few lamp styles to choose for your home.

With victory, these manufacturers will return to their peacetime pursuits, and there will be lamps galore. Once again, dealers' showrooms will be gay with lamps designed to suit every taste, meet every need, enhance any setting.

We look forward to this day of better light, better sight with the

same pleasant anticipation as do our customers. Meanwhile, we urge you to follow these suggestions for making the most of the lighting you have... wartime ways to take fullest advantage of the electricity you need.

It takes 25 tons of blueprint paper to make a battleship. 700,000 different kind of items are shipped to the Army—and they're paper-wrapped or boxed.

"K" ration containers, shipped from the Eastern Seaboard alone, take 662 pounds of paper, a month.

Each Signal Corps radio set takes 7 pounds of kraft paper, 3 pounds of book paper.

Each propelling charge for 155-millimeter shell takes 3/5 pound of paper.

Of course, we'll save waste paper.

Here's a little War time inspiration—The Lord gave us two ends to use.

One to think with, one to sit with.

Heads we win, tails we lose! The War depends on which we choose.

'Tis said Illinois has two women sheriffs who took over their respective husband's jobs when the men went to War.

We do not need any lady "Cops" at North Shore Gas Co., but we shall be glad to discuss employment at our Winnetka Office with a prospective Typist, also a Stenographer, and possibly a Feminine Meter Reader.

Oh, yes, we need male laborers too. We offer good pay for good laborers to work in Highland Park or Waukegan.
