

DEEPS and SHALLOWS

Observations

I ride the crowded trains, and observe... How the dreams of men melt into their lips and play about the curved lines...

—Mary Olson.

Bus-Riding Busy-Body

She sat across the aisle from me in the half-empty bus. Her hair was white and she was beautifully dressed. I watched her for a while as she fidgeted and tapped her feet...

To my amazement she turned and faced me squarely and inquired, "Do you think I'm beautiful?"

"Why, — yes, you're well preserved."

"There it is again. As though I were a batch of pickles or something. How true the saying that a beautiful woman dies twice!

"How wonderful!"

"Yes, but today I've had a horrible experience. I'd like to tell you about it."

"Please do."

"I was shopping when I saw a person walking toward me, the one individual that I did not want to meet. I was near a closed door, so I opened it and stepped inside quickly. The place appeared to be a stage-room. I hid behind some large boxes, planning to come out in a minute or two."

"Was anyone else there?"

"No, but immediately I heard a loud commotion outside, and a crowd surged through the doorway, some of them yelling, 'She came in here! She came in here!'

"Weren't you terrified?"

"I was petrified. It seems they were after a shop-lifter. Well, they took me to a private room and searched me, me, mind you."

"How awful!"

"Yes, I almost died, but I refused to tell them what I was doing in the stock room. At last they let me go. I'll never tell my husband about it. No man would understand the pride that could get a woman into such a predicament."

"But who was the person you were trying to avoid?"

"The man who called me Venus."

—Marmalade.

A popular beauty parlor magazine classifies the Hollywood production of "A Tree Grows in Brooklyn" as strictly a three hanky or six Kleenex movie.

The Kleenex situation being what it is, during a belated reading of the book in bed, we just turned the pillow over whenever it got too soppy. If there had been an incipient Tree of Heaven outside the window, we would have leaped out over it, until, watered with tears, it would have shot up over the roof.

No use worrying about the far future. Who can predict what the Kleenex or hanky situation will be when the movie finally hits our favorite suburb?

Illustrated Lecture at D.A.R. March Meeting

An illustrated lecture will be given at the March meeting of the D.A.R. at the public library, on Tuesday, March 13, at 2 p.m. Tea will be served later at the "Y", by the following hostesses: Mesdames Edward Lawrence, Garfield Day, Mary Helmhold and Franklin Nelson.

The lecture, on historic "Coats of Arms," will be given by Miss Mabel Keech, an authority on heraldry. She has spent the past ten years in tracing genealogies and coats of arms of many thousands of persons, and will show many interesting slides. Miss Keech claims that coats of arms were originally given as "honor grants" and worn on armor as a means of identification.

Mrs. Julius Y. Talmadge, president general of the D.A.R., has announced three new war projects of the organization. "One will bring cheer to thousands of soldiers in the Mayo general army hospital at Galesburg, Ill. It is a radio program distribution system, costing \$60,000, and when it is installed every patient will have the use of headphones, giving him a choice of five radio programs."

The other two projects are for the U.S. navy. One will provide mobile x-ray units for six new hospital ships, and are so constructed that they can be taken ashore even in isolated places. Each unit will cost \$15,000. The third will provide a different type of portable x-ray unit, which can be moved to any part of the ship and will be installed in the seven navy hospital ships now in service.

YESTERDAY and TOMORROW . . . a story of Transportation FIRSTS GRAND-DADDY OF 'EM ALL! and a magnificent thing to behold October 10, 1848, was a great day in Chicago, for it was then that the brig "Buffalo" came into port with Chicago's first railway locomotive, the "Pioneer," on board. True, it was a second-hand locomotive, though in excellent condition. Its one pair of driving wheels were directly under the cab; and its 10'-diameter cylinders tilted slightly rearward—the fashion of the day. It was a magnificent thing to behold! And less than a month later, on its official run, many of Chicago's "Who's Who" made a short run west. There were directors, stockholders, business men and editors—the west's first passengers—who sat on seats fitted hastily into a couple of work cars to experience a new speed thrill. Thus it was that Chicago and North Western became a living, moving reality.
