But it *can* happen, in your new home, unless you give your contractor instructions to include adequate wiring plans in his original blueprints.

In a home with adequate wiring you'll have circuits enough to supply electricity for all your present appliances, as well as for those soon coming your way. There'll be multiple switches to light your way before entering a room and plenty of convenience outlets. Dimming lights, "loafing" appliances and lengthy extension cords vanish . . . you'll have greater safety, too. Now, before you build, is the time to check with your contractor to be sure the wiring plans for your new home will suit your needs. Find out from us or your electric contractor how easy and inexpensive it is to enjoy the convenience of adequate wiring in your home.
