1945 to 643 in 1946. This still is less than two traffic arrests per day for the entire department, even including arrests made on the second violation of the overtime parking ordinances. A related item which may not be fully understood is that the department spends a total of 1,720 hours a year at school crossings. The necessity of placing an officer on a stationary post during these hours precludes his making arrests for speeding and other violations which occur in the area around the schools.

The record demonstrates that a total of 144,848 miles of the city's streets were patrolled by members of the department last year. This may account to some extent for the low crime rate enjoyed in this locality.

The major attention of the department is concentrated upon two major objectives: accident prevention and juvenile crime prevention.

Although there was an increase in juvenile offenses reported, from 290 in 1945 to 325 in 1946, fortunately most of them involved only minor offenses. The indication in most cases is that the subject juvenile had not been taught or did not demonstrate a proper respect for other people's rights and property. As an example, trespassing and destroying property account for 120 of the reported offenses. Highland Park is relatively free from some of the more serious juvenile offenses which attract considerable publicity and attention of authorities in other sections of the country.

Greatest actual loss of life and property in the community results from traffic accidents. The accounting for 1946 shows that there were 302 accidents, in which two persons were killed and 102 were injured. Considerable property damage was incurred by one or another of the cars involved in 235 of these accidents. The department cooperates with other city departments, the Traffic commission, schools, civic and service organizations, and local newspapers in an effort to coordinate an intelligent program of education, engineering and enforcement aimed toward reduction of accidents.

Recommendations

(1) It is recommended that serious thought be given to the question of adding to the complement of the police force, since the department actually has two men less than its pre-war strength when demand for police service was much less. One man was lost for patrol duty when the necessary appointment of a captain was made, and another was lost for actual patrol duty when the very essential relief day each week was made a matter of administrative necessity and fairness to the officers involved.

(2) It is further recommended that consideration be given to the enactment of a bicycle ordinance to license all bicycles in town. To secure maximum cooperation, this ordinance should not be considered a revenue raising measure but purely a safety measure and theft prevention program.

(3) It is recommended that consideration be given to devising some method whereby use of the facilities of the city garage can be made by the police department in the maintenance and repair of the squad cars. Unnecessary costs could be eliminated if the department were not forced to use commercial garages for its needed repair work. The present situation reflects unfavorably upon maintenance costs of the department's vehicles.

Open House at Trinity for Parents

An open house for the parents of the children of Trinity Episcopal church school will be held on Wednesday evening, the 26th, at 8 o'clock. The evening's program will enable the parents to know the content and methods of training their children are receiving.

The parents will follow the same procedure the children do on Sunday mornings, meeting in the church for a brief service of worship, then going to the classrooms to meet their children's teachers and hear the purposes and objectives of the class discussed.

They will then meet for a discussion of the overall work of the school and how the parents and church may cooperate in the religious education of the children. Refreshments will follow.

The committee in charge of arrangements is composed of: Mr. George Holmes, Mr. Robert Capon, Mr. George Pond, Mr. G. K. McCreadie, Dr. M. E. Blume, Mrs. H. S. Millett, Miss Florence Lovett, Miss Barbara Bowes and Miss Catherine Jones.

by the street and sewer departments.

(5) For Fire Equipment Bonds, \$22,000. Proceeds are to provide new equipment for the fire department to take the place of equipment purchased in 1913, which is now obsolete, and dangerous to operate. The acquisition of the new equipment is essential to safety, protection of property, and to the maintenance of low insurance rates.

The members of the city council recommend the approval of all of the bond issues at the election on February 25, 1947, for the reasons briefly stated in this memorandum. It is our belief that the approval of all bond issues will be in the best immediate and long term interests of the city of Highland Park.

Respectfully submitted, THE CITY COUNCIL.

Joseph B. Garnett, Mayor and Commissioner of Public Affairs. Leo J. Sheridan, Commissioner of Accounts and Finance. Lyle Gourley, Commissioner of Streets and Public Improvements. Edward J. Moroney,

Commissioner of Public Property. Oliver S. Turner, Commissioner of Streets.
