"I'm only a fraction!"

This may surprise you. But your telephone instrument is only 1/17th of the equipment needed to provide you with service!

The other 16/17ths includes wire, cable, switching equipment, trucks, buildings, tools and machines. All these things are still hard to get in the quantities we need.

That's why it takes time to complete all the service extensions and improvements we're working on, and why some people are still waiting for telephones.

Despite shortages and handicaps beyond our control, all previous records are being broken. And while there's still a big job ahead, we want you to know we're doing everything we can to give you the kind and amount of telephone service you want and need, just as fast as humanly possible.
