Good Will Scrapbooks Compiled by Pupils of Elm Place School

For the past month the sixth and seventh grade English classes of Elm Place school have been compiling three large good will scrap books to be sent to schools in other countries.

One is to be sent to the Aglibaco school in the Philippines; a second will be sent to the Royal High Preparatory school in Edinburgh, Scotland, the boys' school from which Miss Cruickshank, an exchange teacher, came, and the third to a school designated by the Junior Red Cross.

The part about the United States in the scrap book contains a picture of the president, the capitol, the flag, and maps — geographic, product, and travel — and reports of trips into various states taken by the pupils.

The location, size, wooded areas, flowers, birds, trees, ravines, Indian trees, organizations, activities and buildings are all under the part called Highland Park. Elm Place school section tells about classes, buildings, playgrounds, sports, trips, and exhibits. "A typical day at school" outlines the activities, studies, organizations and special events.

The students tell of their homes, the architecture, hobbies and pets.

It is hoped that the information contained in these scrapbooks will prove interesting to the foreign students and give them a better understanding of the way Americans live. Perhaps the children in other countries will send Elm Place school some scrapbooks in return which may be read next year at school.

Vacation Sports Nine Bad Shots of Golf. Dante and Diegel. Two golfers and a sports editor combine to tell the duffer what is wrong with his game and how to go about correcting it. Starting with an introductory section on grip, stance and swing, illustrated with right and wrong photographs, these authorities in simple terms explain how a few basic principles properly applied will prevent and correct tendencies to do any or all of the bad shots — slicing, hooking, topping, smothering, pulling, pushing, skying, accliffing, and shanking. Swinging into Golf. Jones. The author has incorporated in this book the results of his teaching experience. To him the stroke for all shots is practically the same. There is one must: "hit the ball." Mr. Jones prefers to say, "Swing the club head," and that is the theory he has taught successfully for many years. Hunting in the Rockies. O'Connor.

A good book on the Rocky mountain region for the hunter, and one that offers excellent reading for the armchair traveler. Practical and specific as to methods of tracking and hunting, it is also highly informative regarding animal habits and behavior, and the conditions to be met with by the hunter. Appendix with information on outfits, guides, equipment, gun selection, check lists and bibliography. With Fly, Plug and Bait. Bergman. Another book by one of the most popular fishing writers in this country and Canada. He gives the essentials of the sport as well as the fine points which constitute the difference between a skilled fisherman and a merely lucky one. Every phase of fishing is covered. How to Tie Flies. Gregg.

Drawings, photographs, and explicit text demonstrate for the fisherman the art of tying flies. Contains a list of standard dressings of 334 flies. Fly Tying. Sturgis. A textbook on the subject of making artificial lures for the capture of freshwater game fish, with every detail for their construction. Sailing Made Easy, Told in Pictures. Smith. Primary object of this book is to describe and teach the fundamentals of sailing in a graphic manner, easily remembered and readily referred to. ABC of Boat Building. Stone.

For the beginner who wants to know something of the "whys and wherefores" of the art of boat sailing. Start 'em Sailing. Aymer. Concise, well-illustrated instructions for the amateur in sailing a small boat. Sport for the Fun of It. Tunis. Descriptions of 20 indoor and outdoor games, with brief historical information of each, and lists of equipment and official rules. Lawn Games. Tunis. Brief discussions of different games, followed by rules for each in condensed form. Riding. Lewis. A book of basic riding instruction, using action photographs exclusively. Horseback Riding Made Easy. Souza.
