That is us — the Natural Gas Conversion goes steadily bettering the lives of some 750 people a day. The conversion crews are now at work in Great Lakes, Illinois, and will be in North Chicago in a few days.

Little Willie, exhibiting his skill in riding a new bicycle, came down the street in front of his home. "Look, mother," he cried, folding his arms, "no hands."
Again he came into view, this time coasting with his feet off the pedals. "Look," he shouted, "no feet."
Half an hour passed, and little Willie again put in his appearance. This time, somewhat subdued, he gurgled, "Look, mother, no teeth."

Philoxenus was a Greek who enjoyed food. He wished that "nature had made his necke larger than the necke of a crane, to the end that he might have felt a long while the sweetness and pleasure of meat and drink going down the throat."

An Automatic "CP" clock controlled Gas range cooks foods better, faster. Automatic controls turn the oven on or off at the times you desire. Better Your Living with Natural Gas.

Facts About Corn
An old farmer tells us that corn should be in by May 15, and for every day lost after that in planting, the forfeit is one bushel to each acre in volume. And of course we all know that corn should be knee high by the fourth of July.
