PLAY SAFE...

THROW AWAY THAT FRAYED CORD!

If lamp and appliance cords in your home are badly worn and beyond repair, replace them before they cause trouble. Serious damage can result from exposed wires. They cause short circuits, waste electricity, blow fuses.

During the war, all of us had to get along with makeshift wiring of inferior quality. Today there is no reason why every home shouldn't have wiring that's both safe and adequate.

You owe it to your family to check through your home for worn-out electric cords today. Replace every frayed cord with a new one of good quality. Then, lengthen the life of these wires by handling only the plug when disconnecting a cord from the wall socket—never yank an electric cord!
