Replace FRAYED Cords NOW!

Puppies aren't the only ones who can harm themselves with worn-out electric cords. The entire family, from infants to adults, are endangered by worn-out wiring.

Exposed wires are often the cause of blown fuses, wasted electricity and short circuits. Check your home for this common hazard and eliminate it.

Safe, adequate wiring is again possible after wartime shortages.

You no longer have to "get by" with makeshift, inferior wiring—replace every frayed cord with a new one today. Educate each member of the family in this elementary safety rule—never yank an electric cord—handle only the plug when disconnecting from a wall socket.
