**THE NORTH SHORE BUS COMPANY**

**What it is!**

**What it proposes to do!**

**Its advantages!**

The North Shore Bus Company will be a subsidiary of the North Shore Line—the Chicago North Shore & Milwaukee Railway Company.

It proposes to operate a service with the latest type gasoline propelled buses to interconnect all of the north shore suburbs between Waukegan and Chicago.

Buses will operate as an auxiliary to the North Shore Line's train service. There is no intention of abandoning the railroad.

A bus service coordinated with railway service would relieve the trains of some short-haul riders. This would have the effect of eliminating many train stops resulting in an improvement of the service to the passengers and shortening the running time.

All north shore cities, towns and villages are expanding rapidly and will continue to grow. Increased transportation service to keep pace with the progress of these communities must be met. No more railway station stops can be added without materially interfering and impairing the present service. A supplementary coordinated bus service can supply these transportation needs and at the same time such operation will tend to improve the railway service.

**A frequent and convenient bus service offers numerous advantages:**

1. Loading and unloading of passengers at the curb.
2. Street intersection stops instead of limited railway station stops.
3. Flexibility of operation around unusual situations.
4. Virtually a door-to-door service.
5. One (1) bus will do the job of 30 automobiles. (The average automobile carries 1½ persons—a modern bus of the type to be used seats 44 persons).
6. Shoppers can avoid parking worries by using the bus and lessen the number of automobiles on the streets.

Establishment of the bus service will provide a distinctly new addition to the transportation facilities of all the north shore suburbs, further enhancing real estate values and building development. Coordinated with trains of the North Shore Line, it will afford a daily travel service unequalled for frequency and convenience.

We feel that the bus transportation is vital to the well-being of the cities, towns and villages of the north shore area and for the continued operation and improvement of the North Shore Railway train service.
