You KNOW this isn't safe . . .

And neither is defective wiring!

YOU wouldn't think of giving a child a loaded gun for a plaything. But you may have electrical appliances in your home that are equally dangerous. You can't always see the defective wiring in lamps, toasters, irons, or grills—the danger may lie in faulty inside wiring.

Be sure that appliances you buy are top quality. Have a qualified electrician check the appliances and electric cords in your home today. When you see a frayed extension cord—discard it and replace it with a new one of good quality. Watch for broken sockets and wall plugs. Have an electrician inspect your appliances—be on the alert yourself—and be safe!
