**FIRST CHURCH OF CHRIST, SCIENTIST**  
387 Hazel Avenue

This Church is a branch of the Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The Sunday morning service is held at 11 o'clock and the Wednesday evening meeting, which includes testimonies of Christian healing, is at 8 o'clock.

Subject of next Sunday's Lesson sermon, "Unreality".

Small children are cared for during Sunday church service.

Sunday school is open to pupils up to the age of 20 years, and is held Sunday morning at 9:30.

A free public reading room is maintained by this church at 43 N. Sheridan road which is open daily from 9:30 o'clock in the morning to 5:30 o'clock in the afternoon.

On Sundays the reading room is open from 2:30 to 5:30. Here the Bible, and all authorized Christian Science literature, may be read, borrowed or purchased.

**Baptisms**  
Sundays: 1:30 P.M., or at other times upon request. Arrangements should be made during the week.

**Last Rites For Leslie B. McCaffrey**

Last rites were held at the Immaculate Conception church last Wednesday for Leslie B. McCaffrey, 669 Central avenue, who was found dead in his room on Monday, March 29. Efforts of an inhalator squad from the Highland Park fire department failed to revive him.

A veteran of World War I, Mr. McCaffrey served overseas in France as first lieutenant in an artillery outfit. He was born and received his early schooling in Highland Park, leaving University of Illinois to enlist in the service.

Since the end of World War I he was engaged in the real estate business and served some fifteen years as postmaster at Ft. Sheridan, where he resigned a year ago to become Highland Park manager of the Chicago Motor Club office. At one time he served as commander of the American Legion post in Highland Park.

Surviving are his widow, Elizabeth; three daughters, Ann and Carol McCaffrey, and Mrs. Virginia Johnson of Chicago; two brothers, John and Frank, both of Highland Park; and five sisters: Julia, Margaret and Molly McCaffrey, Mrs. Alice Duffy, all of Highland Park, and Mrs. Frank Crum of Millington, Ill.

Interment was made at Ascension cemetery.

**"GOD OF ATOM" Film To Be Shown**

"THE GOD OF THE ATOM", a sound motion picture revealing the power of the Atom Bomb as it relates to the future of the world, will be shown in the First United Evangelical Church of Highland Park in their church on South Green Bay Road. The Men's Fellowship organization of the Church has arranged for this showing on Monday evening April 5 at 8 p.m. The film had to be booked several months in advance in order to arrange for the local showing, due to the great demand for the picture.

The Film has been produced by the Science Institute of the Moody Bible Institute, with Dr. Irvin Moon as the Director of the film in the studios in Los Angeles. The Film has been shown in hundreds of Churches schools and institutions and presents the power of the Atom in a graphic way. The

film will be shown free to all who desire to see it, but an offering will be received to defray expenses.

The picture is in full color, with sound effects including actual on the spot shots at Nagasaki and Bikini. More than 75,000 people are seeing this film each month as it is shown in hundreds of schools and churches. The problem of the Atomic Bomb is discussed in the picture, and a solution for the problems arising from it is pointed out in the Word of God.

The picture will be shown in Highland Park by a special representative of Moody Institute in the person of Leonard Skibitzke.

A young doctor had set up practice in a small community and business was not flourishing as he had hoped. He was sitting in his office reading one afternoon when his hired girl came to the door and said:

"Them boys is a-swipin' the green apples off that tree in the back yard again, Doctor. Should I drive 'em away?"

The young doctor walked over to the window, considered a moment, and leveling his eyes at the servant, replied:

"No."

## IT'S A "PUSH-BUTTON" FARM AGE IN NORTHERN ILLINOIS

With electricity available to 98.9% of its farms, Northern Illinois is pioneering and developing many progressive farming methods. Close cooperation of our trained agricultural engineers with manufacturers, farm organizations and farmers themselves has resulted in numerous labor-saving innovations which are increasing production and making the farmer's job easier. Below are a few of these developments.

**SILO UNLOADING** is a snap with this automatic unloader which claws the silage loose, then blows it down to a feed cart below while the farmer is doing another chore. Saves five days of work a month on many farms.

**FEED GRINDING AND MIXING** for cattle, sheep and poultry is another "push-button" job. With grinder, mixer and well-placed chutes and bins, you just put in the right ingredients, and flick the switch... the job's done.

**EGG PRODUCTION** is up, with time-controlled lighting, water warmers, and poultry-house ventilators. These aids all contribute to increased egg volume in the fall and early winter when prices are highest.

**WATER** when and where needed, and in the right amounts, is provided by "push-button" irrigation. Overhead, open ditch, or lightweight on-the-ground pipe systems make truck gardeners independent of the weatherman.

**HAY DRYING SYSTEMS** permit speedy drying away of leafy, green, high-moisture and plumb content hay... the kind that produces more milk. It is efficiently dehydrated by air forced through ducts in the mow.

**PORK PRODUCTION PROFITS** begin of farrowing time! Electric pig-breeder help more pigs reach weaning age... help decrease the 33 1/2 per cent pig mortality rate, and send more pork to markets for sale and profit.

Forty per cent of America's farm output, in dollar value, is produced in—or within an overnight ride of—Northern Illinois. Chicago has become the hub of the world's greatest packing and food storage industry, as well as the largest single live animal market. Because the Middle West is the nation's granary, Chicago and Northern Illinois is a huge grain distributing center. As focal point for the nation's transportation network, the food wealth of the fertile upper Mississippi prairies and livestock from the western ranges flow into this area. Agriculture and industry are partners in Chicago and Northern Illinois.
