• CREDIT HIM WITH A HIT

If the heads of the Republican party are being objective in their scoring on the presidential campaign, they credited President Truman with a base hit for his reference at Flint, Michigan, to the income tax reduction. The fact that they tossed him a slow, easy ball, chest high, over the heart of the plate, doesn't detract from the fact that he saw it coming and smacked it.

The nice slow ball they pitched him was, of course, the GOP appeal to Republicans to contribute funds from the income tax cut to the Republican National Committee. The appeal was headed "Don't Feed the Elephant Peanuts," and pointed out that people with an income of \$50,000 saved \$7,533, those with \$25,000, \$3,445 and those with an income of \$15,000 saved \$1,026. President Truman carried the table a little further. He pointed out that a family man making \$60 a week, saved only \$1.65 and that increased prices ate up the \$1.65 and another \$1.50 besides.

Yessir, that one was just made to order for the Democrats, who are selling the theory that the Republican party is the party of the privileged few.

Of course, there are answers, some and some not so good, for such a statement. We hope the Republicans come up with an answer and we hope it's a good one. We hope the answer doesn't deal in the percentages saved by the \$50,000 a year man and the \$60 a week man. The \$60 a week man isn't in percentages. He's dealing in dollars and cents.

WARNING TO THE CITIZENS OF HIGHLAND PARK

Your Fire Department asks your cooperation in burning grass, rubbish and open fires during this extreme dry spell. Before starting fires call your fire Department, we will send a man to investigate and if conditions are safe you will be allowed to burn with care.

These measures are due to the fact that we can only run two pieces of apparatus due to the shortage of man power. The great danger is that once a fire gets out of your control you are liable for any damages to your neighbors property.

Who knows, your home or place of business may catch fire while we are out on these useless fires.

Chief, Fire Department

Remodeling Work Being Completed In District 108

An extensive program of modernization has been undertaken in the schools of District 108 during the past summer. Most of the work planned has been completed and certain items of work will be carried on during the early fall period.

At the Lincoln School complete relighting of all classrooms has been undertaken. The new fluorescent lighting now installed will give a light intensity of 40 foot candles in each classroom, thus bringing them up to modern standards.

The entire building has been weatherstripped and in certain of the rooms acoustic ceilings have been installed. During the early fall period heat control systems will be installed, making possible automatic heat control in an eight zone system for the building.

At the Ravinia School a new exit for the auditorium has been completed and the stage arch has been fireproofed. A fire door has been installed in the understage area, and the doors on the east side of the auditorium are being replaced with standard auditorium doors. A program of complete relighting will be carried on at Ravinia during the fall period and an automatic zone heating control system will be installed.

At Braeside School the entire building is being reroofed with asphalt shingles, and new lighting and zone control heating will be installed during the early fall period.

At the West Ridge School new acoustic ceilings have been installed in all the classrooms and new lighting of the fluorescent type installed.

The work to be carried on during the fall period can be done without interference with the school program and is being undertaken in connection with a master plan of modernization set up for the Board of Education by the school architect, Bertram A. Weber. The balance of the modernization program will be undertaken during the next summer when it is planned that major redecoration and re-equipment of all schools can be completed. Also, at all schools the stage drapes and curtains have all been cleaned and fireproofed as part of this past summer's maintenance program.
