The link that had to come The two main roads to the solution of life's problems, divergent though they may have seemed to be, are the way of Science and the way of Religion. These two paths converge in Christian Science. Today the rational thinker finds logic, supported by proof, in the religious thinker's deep conviction of a primal cause, or intelligence, called God. Science and religion can now agree, for through the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, the actual Science of Christianity has been revealed. This great book shows, through reason and revelation, the solution to problems of health, supply, or of any other kind. It may be read or obtained at all Christian Science Reading Rooms. The coupon is also for your use.
