PROOF of its healing power

The way to health and harmony among men is earnestly and unselfishly sought by both Science and Religion.

Many divergent methods confront mankind. But the claims of all ultimately submit to one test—the test of proof.

The final chapter in the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, consists of 100 pages of unsolicited testimonies from persons healed by reading this book alone.

All testimonies have been carefully authenticated. All manner of disease and discord has been cast out permanently and promptly. This is the proof that Christian Science provides of its healing power.

Science and Health may be read or obtained at all Christian Science Reading Rooms. The coupon is also for your use.

What do telephone capitalists look like?

19,000 Illinois Bell Employees are among the million owners of the business

Now—one million owners of the Bell Telephone System! Among them are 19,000 Illinois Bell employees who share the risks, the benefits, the pride of business ownership. It could happen only in America.

Is it surprising that telephone capitalists include telephone employees, too? These three are typical. They are among the Illinois Bell employees who have bought or are buying over a quarter million shares of stock in the Bell System.

They are part owners of the business—capitalists who invest a portion of their earnings in stock purchases through regular payroll deductions. The capital they provide pays for the buildings, cables and other telephone tools that improve and expand your service, and build new job opportunities.

These telephone stockholders now have a stake in serving you that goes beyond the skill and experience that day after day they apply to their jobs. Now they share in the responsibilities and satisfactions, the risks and rewards of ownership. Only in America are such things possible.

Samuel Merchant runs an elevator in a Chicago telephone building.

Charles Peters splices cable in the Joliet district.
