

ance company of which Mr. Ross was the President.

Mr. Ross replied that Mr. Bole had been appointed when Sir John Macdonald was President of the company.

The name of that company, Dr. Nesbitt continued, was the Temperance & General.

Mr. Ross—Mr. Bole was never employed in the Temperance & General.

Dr. Nesbitt was at a loss to follow up the point, but concluded with a general campaign indictment of the Government and a prophecy of the indignant wrath of the public which was hanging even now like a threatening cloud over the heads of the Ministers.

Questions by Members.

Mr. Whitney, on Monday—Was any person sent by the Government to investigate or examine into the losses and damage caused by the cyclone which devastated a portion of the eastern part of the Province some time during the past summer? If so, has he reported, and what did he report? Is it the intention of the Government to aid the sufferers by the said cyclone; and, if so, to what extent, how and when?

Mr. Matheson, on Monday—Was Frank Sullivan in the employ of the Government at any time during the past month? If so, in what department, in what position and what salary did he receive? Since what time has he been in the employment of the Government, in what positions and at what salary? If not now in the employment of the Government, when did he leave said employment? Was he dismissed or did he resign?

It is understood that the Speaker has received notification in the manner prescribed in the statute of the vacancy in the seat for North Renfrew, caused by the death of the late John W. Munro. The announcement will probably be made to the House on Monday.

Premier Ross was spoken to yesterday about the subject of compelling witnesses to reply to questions that might incriminate them. He thought the position was one that would need no special legislation to enforce it. The position of such a witness would be similar to one in a criminal court who turned King's evidence. There was a provision in the English statutes covering the point there.
