

women, he said, had been paid by Inspector Hammond, and the records showed such payments. These women, he said, swore in court that in order to get convictions at the places where they were sent by the Government they had drunk liquor. It might be, said Mr. Lennox, that the Attorney-General was not aware of conditions existing in his department, but if that were true he should no longer occupy the position of Attorney-General. "You, sir, knew, or you ought to have known, that these men—all of whom are a menace to society, paid out of the Provincial Treasury, labelled by you as representing justice—were going throughout the Province enforcing the O.T.A. Magistrates were afraid to disbelieve the evidence of these criminals and these felons!"

## WILL NOT JUMP AT PARTY'S WHIP

### W. H. Casselman Offers to Move From Government Benches

W. H. Casselman, the independent-minded U.F.O. member for Dundas, who within recent days has opposed the Government upon Chippawa investigation and Dairy Standards Act issues, put it squarely up to the Government yesterday as to whether he would any longer retain a seat among the U. F. O. stalwarts. The Government, through the Premier, hastened to assure him that his presence was still welcome and desirable.

Mr. Casselman moved the adjournment of the Legislature before the orders of the day yesterday in order to state his position. He said that the amendment of the Minister of Agriculture to the Ferguson resolution on the Chippawa investigation had placed independent-minded Government members in the position of voting for Royal Commission investigation of Chippawa or else voting want of confidence in the Government.

"If this Government expects servile support," he proceeded; "if it expects me to answer to the crack of the party whip, as against my own convictions, I want to say I am temperamentally unfitted to be a follower of this Government, and if my presence on this side is in any way objectionable, then I am quite content to occupy a seat anywhere else, where I can exercise my right, as the representative of Dundas, without feeling I am responsible to anybody except my constituents."

Premier Drury arose, and in brief remarks, unheard from the gallery, deprecated any idea of the member for Dundas moving his seat.

### J. C. Tolmie Wants More Pre- cautionary Measures in Industry

An act that will require the Workmen's Compensation Board to adopt the rating system was introduced into the Legislature yesterday by J. C. Tolmie, Liberal member for Windsor. He explained that the bill was to give protection by encouraging the manufacturer to take additional precautions on behalf of his workmen by a rating system which would encourage the manufacturer to put in all safety devices that are known. A penalty would be attached to manufacturers that did not do so. It meant that the Workmen's Compensation Board would be required to adopt a rating system instead of leaving it optional as at present, he said.

M. M. MacBride, South Brant, asked if a fair-wage clause was put in contracts for highway work. Hon. F. C. Biggs replied that all highway contracts let by the department had

## STAFF CHOSEN BY GOVERNORS, SAYS MEMBER

### Thomas Marshall, M.P.P., Further Claims U. of T. President Dictates

### GRADUATES HAVE NO SAY

Several practical suggestions were made to the Government yesterday by Thomas Marshall, Liberal member for Lincoln, regarding the University of Toronto and the matter of its administration. After reviewing what he considered certain weaknesses in the present system, he said that the Government should either hold an inquiry or accept his suggestions.

#### What He Recommends.

His suggestions were that:

The University Act should either be amended or repealed.

The former powers of the University Senate should be restored.

All important expenditures of money, creation of new offices, and all important matters of policy should be laid before the University Senate for confirmation.

Restoration of the office of Vice-Chancellor.

Election of the Deans of Faculties by the Faculties themselves.

All appointments in each Faculty to be made by a joint recommendation of the President of the University, the Dean of the Faculty, and a committee on appointments of the department concerned.

#### Premier Is Impressed.

Premier Drury said that the propositions advanced by the member for Lincoln were sound. There was no question, he said, that the organization was not getting the results it should. He said he would be pleased to report the motion to which Mr. Marshall spoke and under which he brought his suggestions before the House, and to see that the matter would be taken up fully at the Department of Education.

Wellington Hay, Liberal Leader, criticized the Minister of Education that he was not in his seat when Mr. Marshall spoke on his notice of motion. The order ought not to have been called, he said, until the Minister was in his place. Hon. Howard Ferguson joined with Mr. Hay in this view, and moved the adjournment of the discussion "until the Minister can be here."

#### The McGill Resolution.

During the course of his speech Mr. Marshall read resolutions which, he said, were passed by the Rockefeller Foundation on November 18, 1920, granting aid under certain conditions to the medical departments of the University of Toronto and McGill University, Montreal. He called the attention of the House to the difference in these resolutions. The one concerning McGill was as follows:

"Resolved, that the Rockefeller Foundation pledge itself to appropriate the sum of one million dollars to McGill University for general endowment of the Faculty of

Medicine, when the University shall have secured funds (approximately \$900,000) for new buildings for physiology, pathology and psychiatry as agreed to in the program of development."

#### The U. of T. Resolution.

The one regarding the University of Toronto is as follows:

"Resolved, that the Rockefeller Foundation pledge itself to appropriate the sum of one million dollars to the University of Toronto for general endowment of the Medical Department upon condition that the University carry out a program of development including the following items to be provided from funds other than those contributed by the Rockefeller Foundation: (1) a new institute of anatomy (approximately \$500,000); (2) an addition to the pathological laboratory (approximately \$200,000); (3) a new psychiatric clinic
