The following major commercial vessels are reported to be wintering at the various lake and river ports, which we list as closely as possible by area. As usual, we include ferries, tugs, large dredges, etc., only if they have been reported specifically to us and identified as such. We normally do not include scows, derricks, fishboats, small workboats, etc. In the case of some ports, particularly those of the St. Lawrence River, ships come and go from lay-up during the winter; our listings are correct as of date of observation but may not be exact as of subsequent dates.
