

# Milton Community Fund helps purchase equipment at hospital

Halton Healthcare recently purchased three additional adult and pediatric ear, nose and throat (ENT) scopes for use in its emergency and surgical departments at Milton District Hospital (MDH).

This was thanks to a \$26,000 grant from the Milton Community Fund.

"The scopes are used to investigate and treat many ear, nose and throat conditions," said ENT surgeon Dr. Theresa Holler. "The scopes provide crucial information for nasal cavity, nasopharynx and airway as part of an ENT exam. The equipment helps physicians to make a diagnosis for ENT conditions and assess a patient in critical airway emergencies," she added.

Added MDH COO Janet Skupsky, "We are pleased to be offering expanded ear, nose and

throat medical procedures and services at MDH to support our grow-

ing community post-expansion. An expanding set of ENT equipment - two additional adult scopes and one additional pediatric scope purchased through this grant - means we will be able to provide more timely assessments of ENT conditions so that our patients and families can receive the care they need closer to home. We are grateful for this grant from the Milton Community Fund," she said.

The Milton Community Fund program supports activities that enhance the quality of life and/or image of the community.

Funds for this program are provided based on proceeds received from the Ontario Lottery and Gaming Corporation (Woodbine Mohawk Park location).
