

Gold medalists set to compete at nationals

● Continued from page 10

medals.

More than \$65,000 in awards were presented to medalists in select contest areas and categories, as were job offers from partnered organizations at the Closing Ceremony.

Gold medalists in select contests are also eligible to represent Ontario at the Skills Canada National Competition June 4-5 in Edmonton.

No matter where they finished, the lives of many young competitors and visitors have been positively changed forever - from gaining new self-confi-

dence by pushing their skills to a higher level, to winning a medal, or simply meeting a new mentor and discovering new career opportunities that they didn't know existed.

"(They) are the future of skilled trades and technologies in Ontario," says Ian Howcroft, CEO of Skills Ontario. "Because of the contribution from many industry, education, labour, and government partners, including the Government of Ontario, Skills Ontario is able to help prepare Ontario's youth for a highly-skilled workforce of tomorrow through such initiatives."

Following are Halton students who finished in the top five of their division competition:

Secondary Schools

1. Luca Patrick - Architectural Technology & Design

1. Aidan Kolosky - Mechanical CADD

1. Ofer Weis and Matthew Wilson - TV & Video Production Team
