

POLICE INVESTIGATING FOLLOWING BREAK-INS TO MILTON STORAGE LOCKERS

DAVID LEA
dlea@metroland.com

Halton police are investigating following break-ins to several storage lockers at a Milton

condo.

Officers said it is unclear exactly when the break-ins took place.

They said an intruder cut the locks off at least six storage lockers at the

condo, which is located in the Main Street East and James Snow Parkway area.

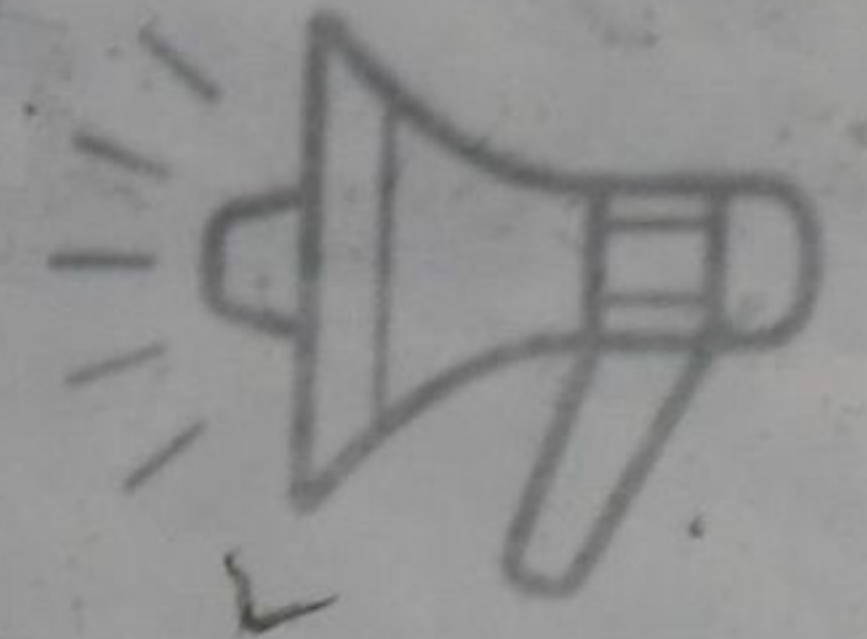

The stolen items included tools, electronics and luggage valued at around \$2,800.

Anyone with information about these incidents is asked to contact Halton police at 905-825-4747 ext. 2410.

Or you can contact Crime Stoppers at 1-800-222-TIPS (8477).

Notice of Study Commencement and Public Information Centre Appleby Line Improvements

The Study

The Town of Milton has initiated a Municipal Class Environmental Assessment (Class EA) for road improvements on Appleby Line between Rattlesnake Point Conservation Area and Derry Road. The Town of Milton has retained Wood Environmental & Infrastructure Solutions to undertake the design of this project. The study is being carried out under Schedule A+ in accordance with the requirements outlined in the Municipal Engineers Association (MEA) Municipal Class EA document (October 2000, as amended in 2007, 2011 & 2015), which is an approved process under the Ontario Environmental Assessment Act.

The Town will be completing road improvements in two separate phases that will occur between 2019 and 2023. Road improvements are to include removal and replacement of existing pavement, road geometrics, curve widening and installation of a retaining wall, installation of storm sewers and new slope and drainage protection measures.

Phase one of road improvements (2019) will include curve widening and construction of a retaining wall along the main curve in the roadway and placement

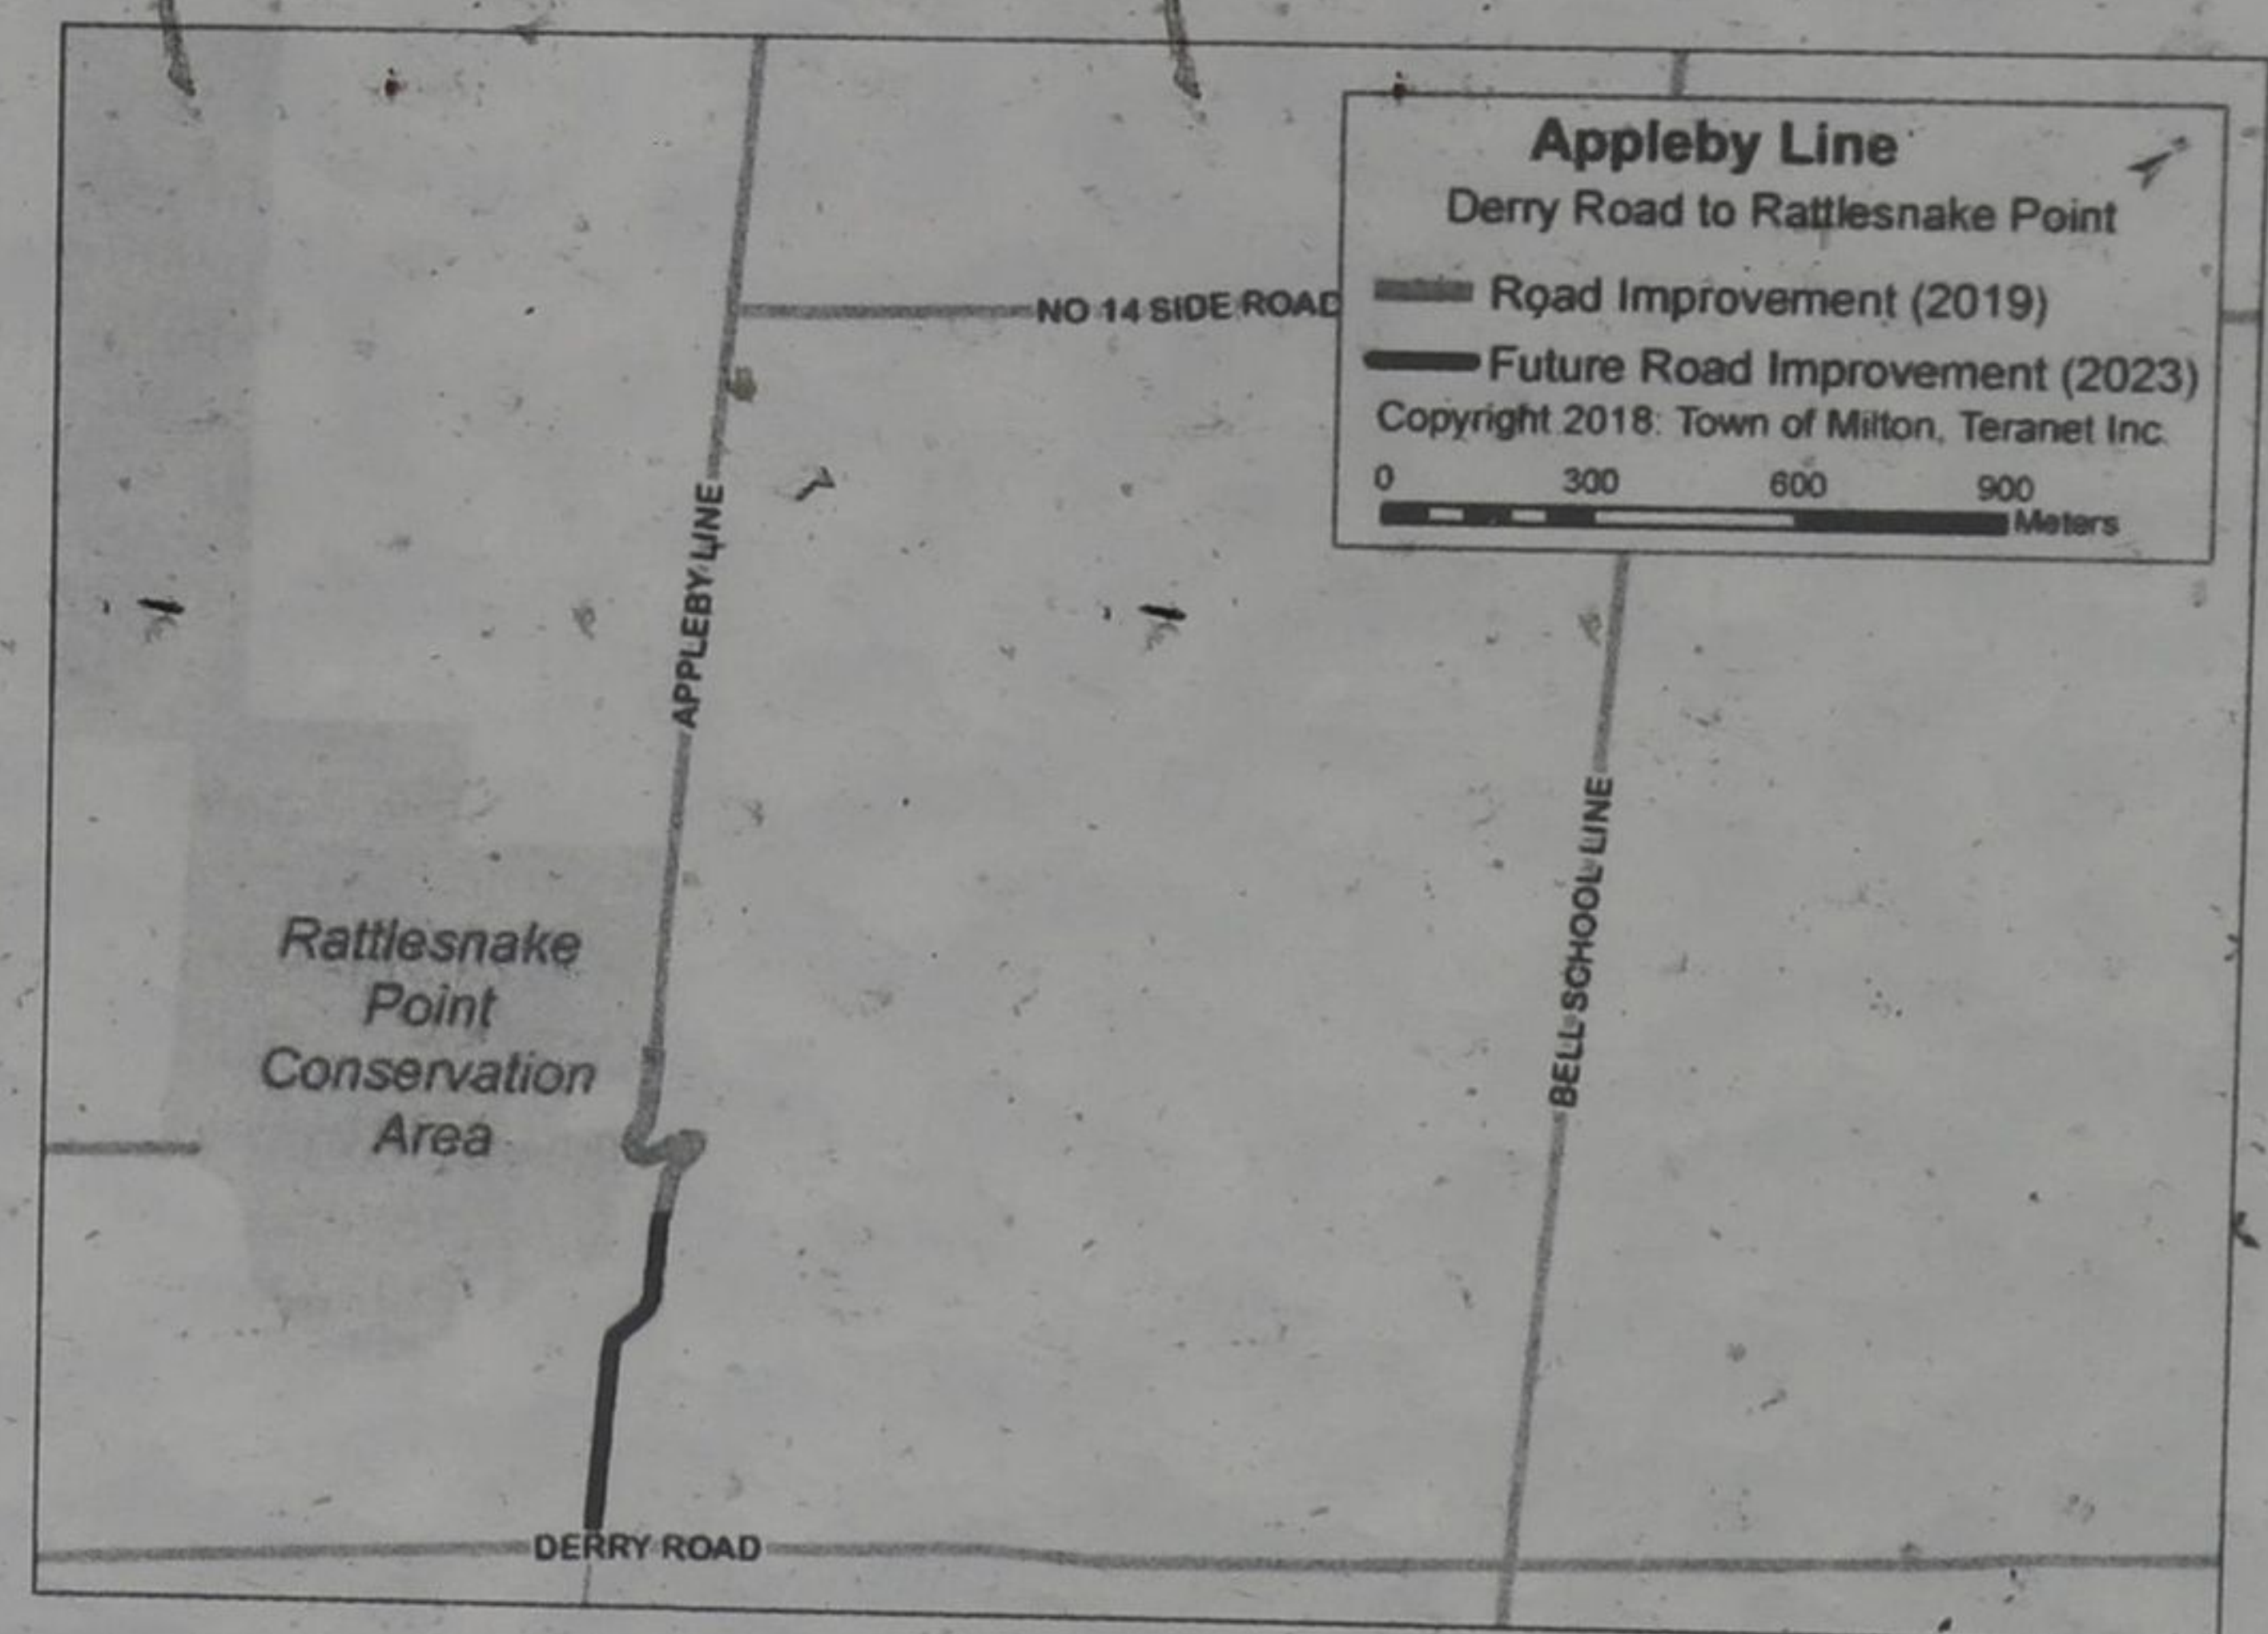

of additional signage along the entire length of the road corridor limits. **Phase two** (2023) will involve reconstruction within the road corridor limits (including removal and replacement of top asphalt), storm sewers and slope and drainage protection. No significant widening beyond the existing two lanes is planned.

Public Information Centre

The Engineering Services Department is advising residents, property owners who reside on or own property adjacent to this project, and stakeholders that a Public Information Centre (PIC) is being held regarding the preliminary design for road improvements on Appleby Line. The PIC is scheduled to take place on:

Date: Wednesday, November 21, 2018
Time: 5:00 pm to 7:00 pm
Location: Hugh Foster Hall
141 King Street
Milton, ON L9T 6Z5

The purpose of the PIC is to provide area residents, property owners and the public the opportunity to review the preliminary design plans, discuss individual issues and provide comments prior to finalizing the design. Residents and property owners are encouraged to attend this meeting to provide comments on the preliminary design.

If you are unable to attend this meeting and wish to obtain more information or provide written comments, please address your concerns to:
