A Milton woman is facing speeding and distracted driving charges after an incident Wednesday, Aug. 21, in which a driver was speeding and texting with two

young kids in the vehicle, say Halton police.

The incident occurred just before 12 p.m. at Henderson Road and Hwy. 25 in Milton as the woman was en route to Oakville, said police.

A Halton detective in an unmarked

cruiser noted the woman was going 105 km/h in an 80 km/h zone while "texting with two young children on board," says a tweet from the service.

She has been charged with speeding and distracted driving, the latter charge carrying a \$615 fine, three demerit points

and a licence suspension upon conviction.

"So crazy and stupid," tweeted Gerald Downovoy in response to the Halton police tweet.

Leigh Buchan added "So stupid. So sad that she put the 2 young children at risk."

The many benefits of keeping children active throughout the school year

Regular physical activity is so important for children's development, not just physically, but socially and mentally. Being active can help children:

- Build strong muscles, bones and improve cardiovascular
- Learn coordination, movement control and confidence
- Maintain a healthy body weight
- Have less risk of chronic disease in later life
- Improve self-esteem and have less depression, anxiety and emotional distress
- Improve learning and attention span, and achieve more at school
- Have more chances to express themselves, learn new skills and have fun
- Build social skills such as cooperation, respect for others, problem solving, athleticism, fair play and teamwork
