MILTON AGRILCULTURAL WORKS

To the Farming Public:

I would warn the farmers not to be mis-led by challenges emanating from irresponsible parties, intended more to injure me than to In order to give an opportunity of judging as to the capability of my Combined Mower 39-ly AND REAPER, I will make the following proposition: I will allow any respectable farmer . G. Willson, and is in doubt as to which make of machine would best suit him, to test one of mine in who wishes to purchase a Mower and Reaper the field during the baying and harvest, with a "Kirby;" the farmer them to purchase the one he likes best.

> I consider this is a fairer and more satisfactory test than any field trial, as each individual can suit himself, and I have no doubt as to the verdict. Ten years ago the "Kirby" machine was manufactured in the Milton Foundry, but they gave such poor satisfaction in comparison with almost any make, that they were all sice abandoned and the farmers who owned them have all since purchased my make of machines. In corroboration of this statement I would refer to such well known farmers as James Sherwood, John C. Robinson, John McDourall and Edward Armstrong, of Trafalgar; A. Stark, of Esquesing; A. & J. Henderson, Thomas Turnbull and H. McMaster, of Nelson; and scores of others. Those men

> are all thoroughly posted in both the one and two wheeled machines, from practical knowledge, and all gave the preference to my Mower and Reaper. The excellence of my machines is amply testified by the great demand which exists for . Although I have doubled the number manufactured every year since I commenced ousiness, still the demand continues greater than the supply, and all the efforts made against me by unscruplous agents of other manufacturers have not in any way affected the popularity of the Milton Combined Mower and Reaper.
