and note what one of the largest concerns in

America say about holding wheat till spring.

farmers who have marketed their wheat regularly in October, have

THE WOOLVERTON MILLING CO.'S record shows that

Without counting storage, the cost of carrying wheat is fully 1 cent per month, and for 6 months would be 6 cents, viz: Interest, 3 cents, insurance and shrinkage, 8 cents-6 cents. Unless the wheat is extra good the shrinkage will exceed this. On this basis 16 out of the 19 years show a loss in holding. The average loss for 19 years would equal 8 per cent. The average gain would be less than 11 per cent. An annual loss of 61 per cent for the 19 years.
