HOW AN OYSTER GROWS.

The oyster at the commencement of its career is so small that 2,000,000 would only occupy a square inch. In six months each individual oyster is large enough to cover half a crown, and in twelve months a crown piece. The oyster is its own architect, and the shell grows as the fish inside grows, be-

It also bears its age upon its back, and it is as easy to tell the age of an oyster by looking at its shell as it is that of horses by

Up to the time of its maturity—that is,

One to two million oysters are produced from a single parent and their scarcity is accounted for by the fact that man is not

the only oyster eating animal. The starfish loves the oyster and preys which it bores right through the shell and sucks the fish up through the hole thus made.—Boston Globe.

Harper's Weekly. Searching for a Gas Escape.

So many accidents of a fatal nature arise from imprudence in searching for "a gas leak," that we have obtained authoritative advice, asserts the British Medical Journal. It comes in the following form : "In case of any escape of gas. I would advise the immediate turning on of all gas from the premises by means of the main cock, always Would it not be wise if some exercises in placed near the meter, then opening doors
