King Solomon's Mines.

gold and silver, apes and ivory and pea- woods. Boone led the way for some horse cultivator.

that he has reason to feel assured that their location has been established almost exactly, at least exactly, at least exactly, at least exactly at least exact most exactly, at least exactly enough to wrote it on her slate. "I see you drown- with a brush. make it possible to find them. In a ing," she wrote. But the teacher merely o the shareholders of the Chartered true. he asserts that the ancient mines are situated on the southern luents of the Zambesi River, and that heir rediscovery is under way of being made a fact.

Now it has been fairly well establish belief that the world is on the track of King Solomon's famous mines at last. In his report Dr. Peters refers to the old tradition that half a day's journey and he investigated that territory. He found ruins there, of which he "The rum is about two miles distant from inja-ka-Fura. I went to this in a courtyard before an ancient Cyclorising up to 12 feet or 15 feet in height. midst of these remains of ancient, very or meat: then perhaps an hour later the ancient, human activity. We discoverground wall which had undoubtedly often possible, under favorable conbeen a part of a building, maybe a ditions of digestion, to induce the patient

The remains of a ground wall along the edge at the top led me to believe that a second wall formerly ran round the platform itself. Why the old conquerers chose this spot for their fort is easy to see. The Muira touches the bottom of the hill; so water was handy. A second river we have discovered at the back of more of the Cyclopean building." Dr. Carl Peters started on his expeditime his trip was dismissed without must rise. much talk as being merely one of many lesser exploring enterprises.
