houses, which formerly proved detrimen-

tal to the health of so many men, has of

late years been reduced to such accuracy

tically eliminated in all but the name,

and tea is now tested by sight and smell,"

remarked a leading ten importer recently.

In a few minutes the liquid shows a tin

of green or brown, and the length of this

time and the shade of the color produced

are important elements in the test. The

tester then, with the aid of a spoon, in-

hales the rising steam from the mixture.

This is called 'getting the aroma' and is

the most important part of the test. He

may perhaps in some cases actually taste

the liquid, but this is no longer generally

done. Color, aroma and the 'liquoring

qualities' of the tea are sufficient grounds

to judge by. The old time tea tester was

ended his career with heart disease or
