# Two Minute Talks About RANGE for Goal or Wood

F course the Pandora Range is a few dollars more than an ordinary range. But it will soon pay for itself in the fuel it will save

The Pandora Flue System and Wide Fire Box, designed by our brainy stove experts, save about half a ton of coal per year, because they supply more air than the flue systems and fire boxes of ordinary ranges, causing better combustion of fuel.

The Steel Oven saves some more fuel, because it heats up more rapidly than a cast iron oven. The heavy Fire Clay Coating on the main bottom of range prevents any heat wasting towards the floor. It drives the heat back into the oven, and thus saves still more fuel.

But the big economizing feature is this: The draft for cooking on top of the range is also the draft for baking in the oven. The heat does double duty and your fuel bill is largely reduced.

Get the Pandora --- the range that pays for itself. No other range is high-class enough for you.
