### HIP Roof Silos

Toronto Silos, because of the Hip Roof, give you greater capacity than any other silo. You can tramp the ensilage right to the top of the walls. The double tongue-and-groove staves of selected spruce, impregnated with creosote, protect the ensilage and resist rotting. You need an ensilage cutter of your own. The Toronto Ensilage

Cutter is of a new and better design. Runs smoothly and lightly without clogging or other trouble. You should know more about these two farm necessities.
