Ef- should be out of reach of the children Agricultural College at St. Vital, Man., forts will be made, however, to get and should be kept locked. Print a a water tank with a capacity of 125,000 month from now. It is unlikely that list of your supplies and tack on the Imperial gallons. The structure is there will be a campaign in Grey coun- inside of the door. It should contain mounted upon a tower, the total height being 160 feet. The weight is somewhat in excess of 100 tons. The cost, including foundations, was approximately \$16,000. Where such a means of water supply is resorted to in climates that are subject to severe freezing in winter time the main issue to contend with in the design and construction is to arrive at some feasible means to prevent freezing. To this end a riser pipe has been employed. It is built of steel, 6 feet in diameter, the idea being that the diameter is sufficiently large to permit the formation of a natural frost jacket of ice about 3 inches thick on the interior of the riser pipe, protecting the balance of the cross-section from freezing. As an added precaution a 11/2-inch steam coil, to the ex- helped by it. # has been tried.

The decorating of your walls is quite a problem. them to be pleasing in color and appearance so as to make a suitable background for your furniture and pictures.

So the ideal wall finish should be artistic in texture and coloring, absolutely sanitary, and capable of being cleaned if necessary with soap and water-and durable-to avoid a too frequent expense for redecorating.

Wall papers do not meet all these requirements, the patterns and designs fade, the papers themselves collect dust and germs and cannot be properly cleaned. Sanitary experts have proven that any kind of wall paper is unsanitary, and the custom of applying new paper over the old, affords a breeding place for germs. Kalsomine and other water paints, while clean and sanitary, have not the necessary permanency. They

need frequent renewal and often rub off on ones clothing-smudges and finger marks cannot be washed off satisfactorily. The product that meets every requirement is Sherwin-Williams Flat-tone, a durable, flat-drying oil paint made in a variety of twenty-four beautiful shades, the selection of expert decorators. This finish can be washed with soap and water, and will last for years.

Come and see us about S-W Flat-tone. It is put up in liquid form ready for use. Ask for a color card of the pleasing shades.

The sin is there, but he, in the manhood, shall rule over it.

Member for East Hamilton in the Ontarlo Legislature. Mr. Studholme is the sole representative of the Independent Labor Party in the House and he is a real fighter when the rights of the workingman are at stake. When a vote is taken on any subject he always explains, just before division, his reasons for supporting or condemning the paricular matter under discussion.

## THE CANADIAN "MOVIE"

American Suprised at the Lack of British Scenes

An American visitor to Canada has made it his business to visit the moving picture shows in both the east and the west, and he has recorded his observations in a letter which appeared in the New York Times: "The moving pictures shown in Canadian cities, with few exceptions, are of American manufacture and depict scenes in the United States. Across the screen march our soldiers and over them waves the Stars and Stripes. It is that flag that flutters over many buildings and waves over many a battlefield. When, almost without exception, the hero dies for his flag it is the Red. White and Blue. And it is the men of Uncle Sam who arrive at the frontier post in time to save the hero and the heroine." The events and scenes thus de-

picted are accorded varying receptions in different localities. "In Eastern Canada, I have seen such films received in silence or with audible expressions of disfavor. Not always in the disapproval a sign of ill-feeling. Once in Winnipeg when scene after scene from San Francisco to New York appeared, a man next to me turned to his companion. "Why don't they give us pictures of what is going on in England?" Now, that man was simply homesick. He had watched picture after picture and there was nothing of the happenings at home. In this respect the feeling that moves an Englishman is the same that would move a Swede lumber jack up in Michigan. Both simply want home scenes."

Man's Best Age

Medical statistics as to the age when man has the most intellectual vigor give interesting results. It is from forty to fifty-six years that the most brilliant things have been accomplished by the majority of human beings. Chemists and physicians have made brilliant discoveries at forty. Poets have accomplished masterpieces at forty-four, and novelists two years later. Famous warriors average fortyseven, musicians are most brilliant at forty-eight, and actors at the same age. Moralists are greatest et fiftyone, politicians at fifty-three, humorists at fifty-six, thus demonstrating that the last thing one learns is how amuse one's contemporaries. Will Prevent Erosion
