Doughnuts that melt m your mouth! The EASIFIRST way

What is the secret? Well, the cook and the recipe both count, but the big factor is really the frying fat you use. You see, EASIFIRST will stand a high temperature—you can make it 100 de-

grees hotter than lard and 200 degrees hotter than butter before it smokes or burns. This means that when the doughnut is dropped into the hot EASIFIRST a protecting crust is instantly formed around it - no grease soaks in to make the doughnut heavy or soggy.
