the seals did not pay any attention to the men, some of them did not ! even raise their heads. If they were driven to move they would settle down again, first covering their backs with sand, which they threw up with their front flappers. When those that went into the - ocean returned, they got out of the water very slowly, spreading the flappers to get the benefit of each wave. When they are out of the water they crawl great distances. When crawling, they resemble huge inch-worms, for they arch the body, drawing the hind quarters forward, and shifting the fore quarters with the front flappers braced outward. These seals fight frequently. They crawl slowly within striking distance, and then, rising on their front flappers, draw back their big noses, open their mouths very wide, and strike at one another with their
