ever, for lobsters must be furnished Only five of the islands are inhabtin's, St. Agnes and Bryher - and Hugh Town, on St. Mary's, is the capital. Above this city towers Star Castle of Elizabethan days.

Until the acquisition of the island by the Prince of Wales they have been governed by a lord proprietor since the time of Elizabeth. Though the inhabitants of the islands have been greatly benefitted under the system inaugurated by the last family of proprietors, some peculiar incidents of their tenure have been It seems that at one time there were people living on the Island of Samson, but in order that the Scillies would not have to furnish sustenance for many people, he transported all the Samsonites, as well as the poor of the other islands, to the mainland, and it is said that his tenants were allowed to keep only one son with them. Consequently many of the children had to be sent to sea or to the shipyards, but those who were left behind grew in wealth, and the islands generally prospered as a result of the intelligent despotism.

WAR AND MUSIC.

Genius Is Not Altered by International Struggles. "War does not change us, nor does

it alter our preoccupations—it merely quickens and confirms us and all that relates to us," says Mr. Sydney Grews in the Contemporary Review. "In music, Beethoven after 1815 continued the way he had followed since 1800. Weber also went his, and Schubert commenced and completed his lovely, lonely flight, his back turned upon the West. The new spirit dominant between 1825 and 1850 was very largely a reaction from the Napoleonic Wars, but its beginnings lay elsewhere, and it would have filled Europe had Napoleon never existed. It was a swing of the pendulum that made the passionate nationalist Chopin, the introspective Schumann, the conservative Mendelssohn, the idiosyncratic Berlioz, and that strangest of all compounds among musicians, the fashionable, conventional, artificial,

wildly natural, mystical Liszt. "These men were native to a phase that was inevitable in view of what had occurred generally since the middle of the preceding century. But the wars of 1790-1815 re-acted upon these younger men and affected their art. The wars at once intensifled their qualities and enlarged their opportunities. For the immediate outcome of such disturbances is a sudden and complete releasing of individuality, exactly as their ultimate outcome is the controlling of the same. After the individual Romanticists came the modern Classics, Wagner, Brahms, Franck, and Berlioz in his middle age. "The significance of Bach is the

same, also the significance of Palestrina, though far more remotely and obscurely. I believe that the comsecond second second ing thirty years will repeat the tale. And as I personally understand responsibility I hold that it is the duty of every poet and musician to shorten the interval, first by understanding himself, and secondly by understanding his period, that average whole of which he forms a special
