Canada Confident of the Future

ing to regain her after-the-war stride in the midst of many difficulties, — debt, deflation and depression being some of them.

Quack remedies and academic theories beset her path on every side. Some suggest that our debt worries can best be eased by going further into debt. Others preach blue ruin, decry their own country and indulge in mischievous propaganda generally, while still others look for a new social order or some miraculous sign to indicate a better coming day-all this in apparent forgetfulness of the fact that just as there was no royal road to win the war, there is now no royal road to pay for it or regain our former buoyancy, vigor and confidence.

Some are leaving Canada hoping to escape taxation, only to find there is no escape anywhere. In seeking for easy remedies too many of us overlook the fact that the greatest remedy is honest, hard work faithfully and intelligently performed, accompanied by old-fashioned thrift.

It takes time, it takes patience, it takes grit. But every Canadian knows in his heart that Canada is coming through all right.

Our Experience Proves It

Look back over the path Canada has trod. The French Colonists, cut off from civilization by 3,000 miles of sea, faced a continenta wilderness—without the aid of

even a blazed trail. They had to fight savages, frosts, scurvy, loneliness and starvation.

The United Empire Loyalists subdued an unbroken forest in one generation, growing their first wheat amid the stumps and snags of the new clearing.

The Selkirk settlers came to-Manitoba when the prairie was a buffalo pasture, and grew wheat where none had grown before and where those who knew the country best at that time said wheat would never grow. Today the Canadian prairies grow the finest wheat in the world.

In proportion to population Canada stands to-day among the wealthiest nations in the world, with average savings on deposit per family of \$800. Canada's foreign trade per head population stands amongst the ghest of the commercial nations, being \$192 per capita in 1922-23, as compared with \$135 in 1913-14, the "peak" year before the war.

New Opportunities for Canada

In Canada, although prices in the world markets fell below war level, our larmers reaped last autumn the largest grain crop in Canadian history, and Canada became the world's largest exporter of wheat, thus in large measure making up for lower

Last year, Great Britain, after an agitation extending over thirty years, removed the embargo on Canadian cattle, and a profitable and practically unlimited trade is opening up for Canadian stockers and feeders.

"The 20th Century belongs to Canada"-if Canadians keep faith.

The next article will suggest prac-tical opportunities for profit making on our Canadian farms.

The Duty of Fire Prevention

Carelessness with cigarette butts, cigar ends, matches, pipe ashes, camp fires, fly smudges, railway locomotives, slash-burning operations-human carelessness of some kind accounts for over 95 of the forest fires in Ontario.

It is impossible to say how many fires along railway lines are not due to engine sparks, but to the thoughtless smoker tossing away his cigarette or cigar butt. However, there is no doubt a fair number of forest fires originate in this way, and such are preventable. Each individual should realize his personal responsibility to be careful with fire in any form in northern Ontario.

Forests The Ontario fire ranger is at the mercy

of all types of carelessness, and cannot prevent fires starting, as a rule. He can only attempt to limit the consequences. He is entitled to your help and co-operation by being careful with
