INDIVIDUALITY IN THE HOME

Arrangements Able to Reflect in a Thousand Ways the Personality

of the Occupant.

On the subject of individuality in the home a recent writer has this to say: Individuality is as important to a house as personality to a woman. A room should be as sure an index to the character and taste of the person who occupies it as the clothes she wears or the books she reads. The truly interesting interiors are the ones reflecting in a thousand subtle ways the graclous personality of the occupant. A favored color repeated here and there -unusual bibelots culled from far corners of the globe -- a rug that immediately challenges attention—these are the things that stamp a room and render it infinitely desirable. You are all familiar with those interiors perfect to the last detail—every piece of

furniture of the right period and in the right place, and we all know how uninspired they are and how difficult to live in. Nowhere is the unusual touch, no sense of any personality breaks through. Extything is steree- English Ginghams..... | Needle Books. typed and consequently dull.
