man wished to be made free of the startling message: "East-bound train company of jovial fellows, he had to gone. I have gone, too." A few Prove himself by drinking a yard of minutes later the south-bound exalé, or sometimes, a yard of port press from Chicago crashed into the The test sounds rather severe, but El Paso train. as a matter of fact, the yard only holds a little more than a pint.

too much to be swallowed at a draught, however, the test must have been distinctly uncomfortable. For the man who drinks smoothly and steadily to the last drop the yard has no terrors; but the unfortunate who pauses to take breath will find that what remains of the liquid wil' spurt out over him.

# Butter From Fish.

The Indians of British Columbia and Alaska obtain their butter supply from a fat little fish called the ooliehan.

Every summer this fish comes up the rivers from the ocean to spawn, and millions are caught in nets daily. They are then thrown into rough tubs, made from tree-logs, in which inventions. they lie exposed to the sun.

When thoroughly softened they are taken from the tubs and thrown into the operating-room. Dr. Davy, the has been heated by dropping red-hot stones into it.

As the oil from the fish rises to the top it is skimmed off It hardens had on the pain led to his making quickly, looks like laid, and tastes like butter. The Indians usually make enough of this butter during the summer to last throughout the water.

How could a woman, not yet bereft of youth and charms, live alone in the forest, among a troop of soldiers Her scruples were relieved by two soldiers, who at the last moment refused to embark without their wives, -- and by a young woman, who, impelled by enthusiasm, escaped

two rowboats

On the morrow, the men set to work to begin their encampment. Malsonneuve felled the first tree. Soon the encampment was enclosed with a palisade and a little later tents were replaced by structures of wood. Such was the founding of

In the following year a hospital was built, and to protect it against the Iroquois it was surrounded by a palisade. According to the archives of the Seminary of Ville Marie, the hosbital was sixty feet in length and twenty-four in width, with a kitchen, a chamber for Mlle. Mance, others for servants, and two large apartments for the patients.

It was the intention of the founders of Ville Marie to establish an Indian settlement in the neighbor-(hood, and to teach the Redmen to ceeded had it not been for that pest most a year passed after the founding upon ten Algonquins. The latter, of the existence of Ville Marie, which, being not distant from their

encounter-with the Iroquois, they fled

The pursuing Iroquois, to their (astonishment, came upon the new They reconnoitred the place, and then went back to their cantonments in the country south of Lake Ontario with the unwelcome news. From that time forth the colonists at Ville Marie had no peace; no more excursions for fishing and hunting; no more Sunday strolls in the woods and meadows. The men went armed to their work, and returned at the tack. Through the summer months quois lurked about Ville Marie, killing by stealth when it was possible,

and it is because of that work that in the group of statuary that forms the monument commemorating the founding of the city, a place has been given to the figure representing the The unicorn which figures on the first nurse in Montreal, and the founcoat of arms of England has always der of its first hospital.
