Fickle Fashion Affects Trade. That the instability of industries! may often be attributed to fickleness of fashions is evidenced by the fact that shingling has, naturally, killed ' the hairpin trade, and seriously reduced hairbrush sales. Owing to the "slip-on" dress, button makers have seen dwindling profits for the last three or four years, whilst hooks and eyes have vanished, of course.

Magistrate Gave Decision. "I understand," remarked Mr. Callahan to his friend, Mr. Casey, "that." the judge fined ye \$10 for assaulting Coughlin the other day." "He did that," answered Mr. Casey, "an' it was a proud moment, I'll tell ye, whin I heard the sintince." "How's that?" "I'm thinkin"." continued Mr.

Casey, "that it showed which one of

us had the best of the fight."

> three or four times. Several large O. A. College. Warm Water for Laying Hens.

Ice in the water pan will not help egg production. If trouble is experienced during the very cold weather, in keeping the poultry drink, water or milk from freezing, it may be overcome by using any one of several devices. The vacuum water fountain so constructed that warm water put in it will keep warm until used, lasting all day. gives very good service. If the house is equipped with electric light there are a number of device such as "hot points" and "carbon bulbs" that may be suspended partly in the water or milk to give the necessary heat to keep the drink palatable. There are kerosene heated fountains available that are generally satisfactory when given close attention as to adjustment and cleanliness. The birds must drink if they are to produce, and snow or ice water are, not generally palatable to high producers.-L. Stevenson, Director of Extension, O. A. College, Guelph.

Keeping Track of the Farm Income. In every other line business worthy of a name, record is kept of the receipts and expenditures. A study is made of these business records. Knowledge is accumulated and improvement made. The farm business cannot make much progress toward providing an increased income until the farmer adopts a system of record keeping, and studies his balance sheet, every week, every month and every year. Such study reveals the reasons for profit and the cause or causes of loss on operations. It is only once in a great while that we meet a farmer making much progress without keeping records of his farm operations. The great majority need to do it for their own and the farm's
