INTRIGUE.

Was Cause of All the Trouble-Wished to Control Destinies of Her Adopted Country.

That all the recent trouble in Ru-Dowager Queen Mar.e is the statement of former Princess Catherine that the princess writes as an avowed enemy of Marie does not make her statements less interesting, hough suggesting the propriety of receiving them with caution. The origin of the trouble is to be found in the war Rumania remained out of the strug gle for some time and their entered on the side of the Allies. It had been expected that she had employed the when her nearest neighbors, Bulgaria and Serbia, were being decimated, to bring her own weapons to a razor edge, and that she would exter the fray with a force that might make her the decisive factor. But the truth is that Rumania was hardly in before she was almost crushed Mighty blows fell on her, and there i came a time when it seemed altogether likely that King Ferdinand would make a separate peace. That was his . own desire, but he met strong opposition in Queen Marie, who remained, staunch for the Allies. Prince Carol. also shared her views and between them they are credited with having

' induced Ferdinand to continue the struggle to a victorious end. The fact that Carel had supported her is said to have given Marie the idea that he would always be pliable and that when he came to the thicke, she would be able to rule through her son. This seems reasonable enough, for the ambitions of Marie, care as notorious as her capacities. 1 happened that Ferdinand was on particularly friendly terms with Queen Sophie of Greece. The pair of them | had the idea that their children could | be most happily wedded. The Princess Radziwill says that Marie v.a. ignorant of the negotiations and only learned of Carol's bethrothal when

it was officially announced. This rather hard to believe, but we can make a gulp and continue with the I story told by the princess. Marie had Wother plans for Carol. She wanted him to marry a Princess Stirbey, for the Stirbeys were one of the most powerful of Rumanian families and Prince Stirbey, head of the clan, had a always been her devoted friend. Carol, however, wanted to marry Zizi Lambrino, and did as a ma ter of fact i go through a ceremony with her

which was afterwards annulled. Marie's disappointment over his | marriage with Helene is said to have turned her into the implacable enem. of the young Grecian princiss even . before she reached Rumania, and after she had established herself there the intrigue against her proceeded. It was turthered by Prince Stirbey, smarting over his fallure, and by Bratianu, his brother-in law Then | Carol became convinced his mother was unduly intimate with Stirbey and protested to her. This widened the breach between them because Marie. for political, if for no other reasons, was deeply committed to the Stibley policies. At this time Ferdinand was dying of an incurable disease and the question was raised as to who would: be the real ruler of Rumania when he passed. It was known that if

Carol reached the throne one of his first acts would be to get rid of fitte bey and Bratianu. In this determine ation he was sustained by Hebene who had no reason to like either of them and strongly suspected that they were trying to separate her from her husband. But it seemed at the time impossible that Carol should be kept from the throne. Time was passing and the death of Feedinand would make him king. Then the idea of introducing another woman to win Carol from Helene occurred to some of the con-

spirators. Mms. Magda Lopescu was decided upon and the introduction made. Nature was then left to take Its course. Whether Mine Lupes in knew why she had been introduced to Carol is not known. They became lovers, devoted to cach other became lovers, devoted to each other. Then came the death of Queen Abxandra and Carol wnt to Lunden It was quietly whispered to Mine. Lupescu that she might with rafety join him in Germany. She did so, but was horrified to see the secret in I trigue become an international newspaper feature in a few days. Who gave out the story may be inferred The repercussions of the sensation undermined the tolerance of Ferdi-I nand, already weakened by illness and the knowledge that le was not long for this world. He was induced

to write angry letters to his son, and finally to force him to renounce his claim to the throne. Then Ferdinand died. The reading i of his will proved a shock for Marle It left a large sum of money to Frincess Helene and also appointed her the guardian of her son. Since Prince Michael was the heir-apparent, his mother, who was also his guardian, became to all intents and purposes the first lady of Rumania. Marie

schemed to have herself appointed

one of the regents during Michael's

infancy but fa led in this also. He efforts to have something to say labout Michael's influence were steadfly repulsed by Helene and last summer Marie withdrew from the capital I and retired to one of her castles. wowing that she never would speak Hamilton Jockey Club's Second Sumto her daughter-in-law again. Public opinion showed that Helene had wen the position in the affections of the people once held by the redoubtable Marie, and her son, Nicholas, one of the Council of Regency, announced himself in favor of the return of Carol. So in the absence of Marie, forces were at work which eventually brought Carol back. So it would appear that Marie has lost her great fight to control from the throne or from behind it the destinies of her

mer Meet.

The second summer meeting of the

Hamilton Jockey Club will be held from Wednesday, July 30 to Aug. 6 and racegoers from Milton and vicinity may look forward to another seven days of good sport. At the first meet ing of the Hamilton Club, which just closed a few weeks ago, the racing war much above the average, in fact it was the best seen so far this year on the Canadian circuit, and the second meeting will no doubt prove as good if not better, as practically all the same stables will again be on hand. Already a large number are on the grounds, having shipped direct to Hamilton at gib, goose-neck, gusset, hickey, jig, the close of the Fort Erie meeting and a visit to the track any morning now reveals a lot of activity. The plant was never in better shape. Both the dirt and turf tracks are lightning tast and some very good work outs have been reported. As usual the first race each day will start at 2.30, daylight saving time. The last race each day will be decided over the grass course This is a very popular feature at Han. ilton, both with patrons of the track and horsemen.
