The SNAPSHOT GUILD

YOUR CAMERA LENS

A camera with an anastigmat lens, f.6.3 or faster, is a great help in obtaining clear, sharp indoor pictures such as this.

TAking first-rate snapshots requires good eyes. One is your "eye for pictures," your ability to recognize a picture when you see it. The other is your camera's "eye"—its lens.

You can train your "eye for pictures." The more snapshots you take, the better you learn to see a picture chance when it confronts you. But, once you have chosen a subject, it is up to your camera's "eye" to record it clearly and sharply.

Lenses on most box type or fixed-focus cameras are remarkably good at the price. But the finest camera lenses are known as "anastigmats." They are fast—let in a greater amount of light than the ordinary lens—enabling you to take pictures under adverse conditions, on dull days and at night. And they produce negatives with needle-sharp detail over the entire picture area. Negatives made with anastigmat lenses yield splendid enlargements.

The word "anastigmat" is usually stamped on the mounting of these lenses. It is something like the "Sterling" mark on silver. Actually it means "free from astigmatism." The speed of the lens is also indicated, in the form of an "f-number," such as f.6.3, f.4.5 or f.2.

This speed is important. An f.6.3 anastigmat lens is four or five times as fast as the average box-camera lens. This extra speed makes snapshots possible in dull weather, and with small photo bulbs at night. Again, an f.4.5 anastigmat lens is twice as fast as the f.6.3. And on the better-grade miniature cameras, one finds fast lenses rated at f.3.5 or f.2—so fast that they take snapshots at the rate of ordinary room light, when the camera is loaded with high speed film.

The smaller the "f-number," the faster the lens. Always remember this, when you examine a camera. And when you get a finer camera, with fast lens, treat the lens as carefully as you would a jewel. Don't smear it with fingerprints; clean it occasionally with a soft, lintless cloth. If you treat your camera's lens well, it will repay you with many better pictures.

ANNUAL REPORT I.O.D.E.

The John Milton chapter, I.O.D.E., at its annual meeting held on Friday afternoon, March 3, elected the following list of officers for the ensuing year: Hon. regent, Mrs. R. White; regent, Mrs. C. R. Turner; first vice-regent, Mrs. Dawson; second vice-regent, Mrs. R. M. Fasken; treasurer, Mrs. J. P. Book; Echoes secretary, Mrs. F. Thompson; educational secretary, Mrs. J. H. Willmott; standard bearer, Mrs. Wm. Anderson; councillors, Messdames F. C. Willmott, Jas. Marshall, McClenahan, Fox, Hatley, Houston.

Secretary's Report

In submitting the twenty-seventh annual report of the John Milton chapter, Imperial Order Daughters of the Empire, your secretary is glad to record a year of achievement and progress in our limited way, we have endeavored to fulfill the purposes of the order: to promote love of country, to aid worthy ambition and to help those who find it hard to help themselves.

Tea regular meetings have been held, with several executive meetings called to cope with unforeseen activities. For each month our program committee arranged an interesting program. In May, June, Sept. and October we had guest speakers whose subjects were very diversified, but each one was highly instructive. In May, Mr. Tolton from this district gave us his personal observations of agricultural conditions in Denmark. In June, Mrs. Gardner bore us, in imagination, to various parts of the Empire where she had carried out her journalistic career. In September we were whisked to the centre of "Old London," where Mrs. Mulligan spoke to us of the "Pearly People." Lastly, in October, Mr. Radford, our own Representative J. E. Whitlock acting as toastmaster an excellent program was presented. The toast to the home economics class was proposed by Jack VanGozen and responded to by Jack Johnston. Ruby McPherson proposed the toast to the class in agriculture, with Ross Gordon responding. The toast to the country for Empire study this year was South Africa, proposed by Duffee arranged for two papers on the subject, one given by Miss Mollie MacDuffee and the other by Mrs. Fasken.

At each meeting during the year we were favored by one or more musical numbers, arranged for by Miss Dewar, our ever-to-be-relied-on pianist. These musical numbers were as a rule provided by daughters of the chapter, members and their friends, and added a pleasant variety to the program.

Within the past few days, Death's dark wing has shadowed our chapter, and we mourn the loss of a dear member, Mrs. Robert W. Phillip, who for years shared unselfishly in the activities of the organization.

Two members have been added to the roll, having been transferred from other chapters.

The silk flag which had graced all our meetings from the inception of the chapter in 1911 had become so tattered as to be unfit for use. So this year a new flag as nearly like the old as possible was ordered to be honorably preserved.

The flower committee was indefatigable in its work of remembering the sick and bereaved. Bouquets and plants were sent out and two war widows were remembered at Christmas time. Flowers were presented to guest speakers and a large basket of autumn leaves and chrysanthemums was arranged for the I.O.D.E. tribute at the centenary on Empire Day.

On Empire Day the chapter presented framed pictures of their Majesties to the public and high schools. At the close of the year I.O.D.E. calendars were placed in each room of the public school, in the high school auditorium and in the public library. Scholarships, as usual, were presented to the entrance class for proficiency, and history prizes were given to the junior and senior fourth classes. Five dollars was contributed to the Halton Music Festival association, and fifteen dollars to help the Girl Guides procure uniforms for their summer camp.

Our order recognizes its responsibility in helping others whenever possible. In July the local chapter, backed by the town council, was instrumental in taking nineteen children to Hamilton General Hospital, where their tonsils and, if necessary, their adenoids were removed. We are happy to say that in each case the operation was a success and the child benefited therefrom. In this connection we also gratefully acknowledge the assistance of all the local doctors and also of the Legion.

Milk and cod liver oil are also given where needed to pupils at the public school.

At Christmas time, assisted by contributions from other organizations and individuals, thirty-four care packages, prepared baskets of food and clothing were sent out, and we hope that each basket brought joy to the home to which it was sent.

Each donation was voted to the Chinese war relief, the fire sufferers of Rainy River district, and for the upkeep of the order's plot in the Peace Garden on the international boundary. Twenty-five dollars was sent to the Endowment fund, five dollars to the Sea Cadets, and a similar sum to the Coronation Bursary fund, all of which causes are sponsored by head office.

Money was raised during the year by a tea at Mrs. McNeven's in June, when the flowers were a riot of color, and by two successful bridge parties, one at the Milton Inn in October, and which we are indebted to the hospitality of Mr. and Mrs. John Mitchell. The other was held at the high school in January. Money was collected for the milk fund by a tag day held in late September.

In November Captain Scott was scheduled to address the Canadian club, and the chapter was fortunate in securing him to speak to the ladies in the vicinity at an afternoon meeting in Knox church school room. His subject was the recent crisis in Czechoslovakia, and the interest of the community was evidenced by the large audience present.

In June we had the pleasure of a visit from the Mimico chapter at our summer meeting, and in January of this year, the Hamilton League of Health and Beauty favored us with a demonstration of their work and exercises. At almost every meeting we have had guests who received the cordial welcome our chapter always extends.

The work of the order coincides in some ways with that of the Legion, and we were happy to accept their invitation to meet with them at their service in Grace church on Magna Charta Day in June. Again at the Armistice service on Nov. 11th, we joined with the veterans, the town, the province and private individuals in placing memorial flowers at the cenotaph.

We have many good friends outside the chapter who have helped us make our work a success. We recognize the kindness of the owners and publishers of the Milton Champion in printing this report and in publishing notices and reports of meetings throughout the year. We also owe a debt of gratitude to Mr. Philip for the use of the Hydro truck on various occasions, and to Mr. Yates, who so kindly performed the duties of auditor. Those who provided cars or helped in other ways also have our sincere thanks.

Our regent, Mrs. Dawson, by her un-

feeling tact and kindness and her devotion to the interests of the chapter, made it a pleasure to be associated with her in the work. Miss Blain, the convenor of the child welfare committee, deserves recognition for the efficient way in which she faced the difficult situation which arose. The entertainment and refreshment committees are to be commended for their untiring efforts to see that their department did not fail. The hospitality of the hostesses at each meeting was much appreciated, as was the work of the various committees who did their part in furthering the work of the chapter.

"The old order changeth, yielding place to new,
And God fulfills Himself in many ways."

The year is past, with its gains and its failures, and we know not what the new year may bring forth. Whatever betide, let it be the earnest wish of each member to strive for the best and to encourage in others as well as ourselves a greater loyalty to God, to the Dominion and to the Empire of which we form a part.

ACTON SHORT COURSES CONCLUDE WITH BANQUET

(Crowded out last week)

On Friday evening last the Actor three-month short courses in agriculture and home economics were brought to a successful conclusion when the closing banquet was held in the town hall, with two hundred guests in attendance. According to many of those present it was the finest banquet they had ever attended, and congratulations are therefore due to the young people and also to the ladies of the Dublin W.I., who catered in a very efficient manner.

With Agriculture Representative J. E. Whitlock acting as toastmaster an excellent program was presented. The toast to the home economics class was proposed by Jack VanGozen and responded to by Jack Johnston. Ruby McPherson proposed the toast to the class in agriculture, with Ross Gordon responding. The toast to the country for Empire study this year was South Africa, proposed by Duffee arranged for two papers on the subject, one given by Miss Mollie MacDuffee and the other by Mrs. Fasken.

At each meeting during the year we were favored by one or more musical numbers, arranged for by Miss Dewar, our ever-to-be-relied-on pianist. These musical numbers were as a rule provided by daughters of the chapter, members and their friends, and added a pleasant variety to the program.

Within the past few days, Death's dark wing has shadowed our chapter, and we mourn the loss of a dear member, Mrs. Robert W. Phillip, who for years shared unselfishly in the activities of the organization.

Both Cobalt, Manganese Needed in Making Steel

Cobalt is used in steels that are made to hold cutting edges at high temperatures. Such steels are used in high speed cutting tools and for permanent magnets which observe an authority in the Chicago Tribune.

The United States uses about 10 per cent of the world production of cobalt. It produces none. Imports come chiefly from Canada, Belgian Africa, and Australia.

Manganese is used in small quantities in steel manufacturing to eliminate gases. One to two per cent of manganese in steel increases the strength of the metal. Twelve per cent manganese steel makes an extremely tough metal that is resistant to abrasion.

Small amounts are present in all steels. Steel rails contain 1 to 2 per cent. Frogs, switches and dredge bucket teeth are made of steel containing 12 per cent manganese. The United States produces only an insignificant amount of manganese and uses about 20 per cent of the world output. Source of supplies are Russia, Africa, Brazil and India.

Other non-ferrous metals used in making steel include molybdenum and vanadium.

Molybdenum is used to produce a steel that is capable of being drawn or hammered out without losing its strength and toughness. It makes possible a strong steel that is particularly valuable for tubing and certain machinery parts.

The United States supplies 80 per cent of the world's molybdenum. Domestic consumption takes about 40 per cent of the world supply.

Vanadium gives resiliency and strength to steel used in tools, springs, and machinery parts. The United States produces about 15 per cent of the total output and supplements its supply with imports from Peru and Rhodesia.

'Purebred' Descriptive Of Full-Blooded Horses

The word thoroughbred is often, even in well informed circles, erroneously used in referring to a full-blooded breed of horses—when the correct descriptive term is purebred, writes Capt. Maxwell M. Corcoran in the Chicago Tribune.

Thoroughbred, rightly used, means a definite breed of horse which is commonly known as the race horse. The history of the thoroughbred is well known. The breed descends from the Arab, the product of 200 years of breeding for speed and size.

The breeding still goes on. Not generally known is the fact that it costs more to raise an offspring from a large, fast horse than from a small, inferior one. Thoroughbreds have a general range in size of from 14.2 to 17.2 hands (the hand being 4 inches) and 900 to 1,300 pounds in weight. Color varies greatly.

The chief uses to which a thoroughbred is put are in the field of sports—racing, polo, and hunting. Usually it is much higher strung than a common horse and therefore more easily spoiled.

Because of the long struggle to improve the Arab for speed, faults in conformation are frequently found in thoroughbreds. Commonest of these are small bones and not enough heart girth. Like their Arab ancestors, thoroughbreds exert little effort in motion, giving a comfortable ride. They have great strength, and their greatest asset—endurance—has given rise to the expression, "A clean thoroughbred never quits."

Caribs, Vanishing Race

A vanishing race are the Caribs, Indians who made things hot for Columbus when he discovered America. Only a few hundred of them, living on the island of Dominica, are left today, scientists report. Dwarfish but fierce fighters, observes a writer in the Washington Post, Caribs came from Brazil's Amazon wilds to conquer what is now Venezuela, the Guianas, Central America, and the West Indies. Good seamen, they used canoes with sails. In reporting battles with these Indians, Columbus called them "Caribal," later corrupted into "cannibal," which the Caribs were. The same people supplied a name for the Caribbean sea. They were finally subdued by British and French troops, who sent them into exile. Only a few Caribs managed to get back to Dominica later.

Hardest Period in Life of Dwarfs

The hardest period in the life of dwarfs comes with the first realization that they will never grow more. It comes when they are nearing the teens and when they find themselves outdistanced by their companions, cut off from games and sports of their larger companions, and obliged to seek their own mediums of entertainment. The fact is that they turn to their own methods of entertainment and develop along acrobatic, musical or studious lines.

Ancient Drums of India

The drum is something more, in India, than a musical instrument—it occupies an important place in Indian myth and legend. The most ancient of these drums is the mridanga, the two heads of which are made of parchment and tuned by braces. A mixture of flour and water is frequently applied to the head to increase the volume, and the drum is played with the fingers.

Among primitive peoples the drum is used as a medium for transmitting signals, news and other types of messages. Some of them can be heard for a distance of six miles, and one small instrument, not two feet high, has been known to send its sound for 10 miles.

Speed of Arrows and Bullets

The range and speed of an arrow cannot begin to compare with that of a rifle bullet. An arrow leaving the bow such as deer hunters use travels at a speed of from 120 to 135 feet per second, while the bullet from a 30-30 sporting rifle has a muzzle velocity of approximately 2,000 feet per second. The killing range of the arrow is seldom over 60 yards, while a rifle bullet has a range upward of 300 yards, but the usual kill is made from about 20 yards.

1939 CHEVROLET

The Public is Choosing the Greatest Value

Compare ALL Prices and You, too, will decide that "CHEVROLET'S THE CHOICE!"

Only Chevrolet gives so much for so little! Come to our showrooms and make your comparisons today. Check Chevrolet's new lower cost to buy—to operate—to maintain. Let your own eyes and your own driving reactions convince you of Chevrolet's finer features and higher quality. Check all prices—compare all cars—and you will agree that "Chevrolet's The Choice!" Low monthly payments on the General Motors Installment Plan.

- ADVANCED KNEE-ACTION RIDING SYSTEM** (On Master De Luxe Models) Frictionless Coil Springs, Parallel-shock type Double-Acting Shock Absorbers (front and rear) ... Ride Stabilizer ... and improved Shockproof Dual Cross Steering.
- PERFECTED (QUADRO-ACTION) HYDRAULIC BRAKES** Maximum efficiency with minimum pedal pressure. Double protection added by the under-coil Emergency Brakes Lever, which operates on both rear wheel brake shoes.
- NEW SMOOTH "PULMAN RIDE"** (On Master "85" Models) Long, semi-elliptic, tapered leaf springs with "balanced action" Double-Acting Shock Absorbers, Acting Stabilizer ... Efficient Road Shock Eliminator.
- FAMOUS VALVE-IN-HEAD SIX ENGINE** Only Chevrolet brings you a Valve-in-Head Six Engine at such low prices. Greater power, greater all-round performance—at lowest cost for gas, oil and up-keep—with dependability and long life.
- NEW STEERING COLUMN GEAR SHIFT WITH "VACUUM ASSIST"** You just guide it with your fingertips, and a "vacuum assist" device supplies 80% of the shifting effort! Gives a roomier front compartment. Simple, positive, mechanical hook-up. Available on all models at nominal extra cost.
- NEW "OBSERVATION CAR" VISIBILITY** Wider windshield—large squared windows—more visible speedometer figures right in your line of vision. Safety glass all 'round.
