Milton's New Reeve

Dr. C. H. Heslop, Milton's new Reeve, is a man of varied qualifications. He has had two years' experience on town council, served in the last great war with the Royal Army Veterinary Corps in Italy, is president of the Canadian Standard Bred Society, and holds executive offices in the Halton Agricultural Society and Milton Junior Hockey Association.

Reeve Heslop was born at Appleby in Nelson township, and graduated from the Ontario Veterinary College Toronto. A veterinary surgeon, his father and grandfather before him practiced veterinary science in Halton. The new reeve is a pacing horse enthusiast, and during the past summer was presiding judge at numerous outstanding harness meets through out the province. He broke and educated "Lastic Patch", and has raised and trained such well-known pacers as Jack Abbe, Irene Private and Grattanette.

Sanity in War Financing

Canada's forthcoming war loan can readily be expected to match the pattern of financial policy that will be universally recognized as sound, and one that reflects the benefits of experience from the last great war. Borrowing, in this instance, is a means only of bridging the margin between the amount of money obtainable by taxes and the actual amount needed to pay the costs of a government at war in defence of freedom.

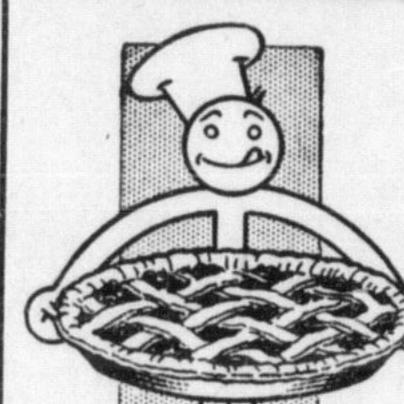

Recognizing the pitfalls of her experience in the last war, Canada, on this occasion, is facing the problem of war financing in forthright manner. Canada's financial machinery has enabled her to set a course at the outset of the new world war that would have been virtually impossible in 1914; it will enable the Canadian people to avoid many of the demoralizing consequences of war, and post-war readjustments, such as befell Canada, and many other countries in the last great conflict.

This war is to be paid for, in so far as possible, as it is fought, rather than to hazard a repetition of inflationary price movements spiralling to an inevitable and expensive day of reckoning. For the past 20 years, Canada and other countries have been paying the price of inadequate machinery, lack of precedent and foresight in financing the last war. Canada now has a broad and comprehensive taxation system and the financial machinery required for exercising the control that is necessary to carry out a policy that will finance the heavy expenditures involved upon wartime conditions without giving rise to unfortunate maladjustments and their inevitable aftermath.

In recent years, Canada has pursued a moderate policy of expansion in company with the United Kingdom, Sweden and certain other countries. In consequence of that policy, Canada was able to reverse the deflationary trend of the early depression years and to facilitate an expansion in national production and business activity that has been more consistent and prolonged than in many countries. She has also effected a general reconstruction of her debt through refunding loans at lower interest rates and has repatriated, during the last five years over \$900 millions of Canadian debt held abroad. The net result has been to effect a substantial decrease in the cost of Government debt and to strengthen greatly Canada's credit position.

The new war loan, like probably all loans floated by Canada during this year, will be on a domestic basis. Canadians will provide the principal and receive the interest. The debt will be owed to ourselves in Canadian funds, and will, therefore, not give rise to the difficult exchange problems and real burdens to the country, which are inherent in external borrowing. In borrowing within our country, the Govenment hopes to see some of the real savings of the people converted into war loan bonds. The latest available figures show a total of \$1,734,800,000 of savings accounts held by depositors in chartered banks, the highest figure in the history of the Canadian banking system. These deposits are held in over 4 million accounts, which probably means that one out of about every three people in Canada has a savings account. By converting real savings into war loan bonds, the individual can make a real contribution to Canada's war effort, and at the same time secure for himself a safe and profitable investment.

The loan is open to popular public subscription. Clearly the call is strong, because the most emphatic demand is the moral obligation of every citizen to guard jealously the rights of freedom and shoulder his share of the bonds just as thousands of others are shouldering

HOSHAVICHE on the Economic Front

"Materials and money count for so much in this war that a resolute, loyal and enthusiastic economic front line may be the determining factor."

To your restless question "When can I help win this war?" — the answer is NOW. On Monday next, the Government of the Dominion of Canada will offer the First War Loan. The purpose of this Loan is to provide money to carry on the war, not only on the battlefields, but all along the Economic Front.

Let us explain what the Economic Front means. It means a war in which the entire natural, industrial and financial resources of the country are used to defeat the enemy. It means a "total war" in which every citizen takes a part, in which his personal resources must support those of the Nation.

In such a war, one of the chief weapons is money. Where is this money to come from? There is only one answer. It must come - and come voluntarily - from the savings of our people. The difference between us and the Germans is that we, of our own free will, lend our money — it is not ruthlessly taken away.

This is your opportunity to do your part in this struggle against Hitlerism. The eyes of the world are upon you, upon Canada, one of the strongest members of the British Commonwealth. Canadians must show that their strength, their courage and their resources are all in this fight against "brute force, bad faith, injustice, aggression and persecution."

The news of the success of this Loan must go ringing round the world.

Be ready to buy War Loan Bonds. They will have the proven safety and salability of Dominion of Canada obligations. Any Investment Dealer or Chartered Bank will take your subscription. The quicker the economic war is won, the greater will be the saving of human lives . . . the swifter the collapse of the enemy.
