HOCCETIONS

-A MENACE!

Active Co-operation of every Ontario Farmer is Necessary to STAMP IT OUT

ONTARIO has a really serious outbreak of Hog Cholera. This deadly infectious disease of swine has reached alarming proportions in the counties of Essex and Kent, with smaller outbreaks in Lambton, Elgin, Norfolk and Haldimand. If the disease is not controlled it is certain to spread to neighbouring counties. Every precaution must be taken. The Ontario Department of Agriculture is actively cooperating with the Federal Department of Agriculture and farmers in their efforts to stamp out this disease.

If the spread of Hog Cholera is not checked NOW, every pig raiser in Ontario stands to lose. Only the immediate and wholehearted co-operation of every Ontario farmer will stamp out this menace to the hog industry.

* HOW TO PREVENT HOG CHOLERA

The Departments of Agriculture strongly recommend every pig raiser to take the following precautions:

- Confine all hogs to pens or yards that have been thoroughly cleaned and disinfected with an approved disinfectant.
- 2. In centres of heavy infection, if possible, keep hogs away from straw stacks as this is a place usually frequented by birds such as starlings, sparrows, and pigeons, which may have come direct from an infected barnyard Destroy as many pigeons, sparrows and starlings as possible.
- 3. Keep dogs out of the pig pen. Keep your dog under control in the daytime and tied
- up at night. Keep stray dogs off your farm. Burn any dead pigs or bury them so deeply that stray dogs will not dig them up.
- Keep all doors closed and protect the windows so that no dogs or birds can enter the
- Do not visit neighbours' hog pens nor allow neighbours to visit yours.
- erinary Inspector of the Federal Department of Agriculture. 13. Feed only carefully balanced rations. Well-fed hogs have the strongest resis-
