## Tear Out This Ad!

TEAR out this ad, bring or mail it in with your order for 200 or more Bray Chicks before the end of January and we will see that you get a Circular Chick Guard free. It's a mighty handy thing to have around your brooder, the first few days—helps keep the chicks close to the warmth, prevents piling in corners and breaks floor drafts.

You don't have to take delivery of these 200 Bray Chicks in January—just order them. But the way things are shaping in the poultry business, we believe it would be good business (if you have the proper equipment to handle them) to take delivery, too.

"One of the Firmest in Years"

You don't have to take your word for that. Look at what the official Dominion Government Egg and Poultry Market Report says about it:

"Storage eggs have now been pretty well used up. It has not been unusual in recent years for a rather considerable volume of storage eggs to be left over into December and even into January, and this has had a depressing influence on the whole egg market situation. This year the situation is considerably sounder."

That's a strong argument, isn't it, to order good chicks (e. g., Bray Chicks) early? Usually, early chicks pay best. Early cockerels usually hit better markets; early pullets are fully developed and laying premium-sized eggs by the time the egg market begins climbing. Why not start earlier this season? And for a first step, tear out this ad, mail or bring it in with your order for 200 Bray Chicks (before Jan. 31) and we will see that you get your Chick Guard absolutely free.

when January 1 stocks are published.

### THOSE NEWSPAPER MISTAKES

(Forwich Record)

Think of this—a subscriber told us that his newspaper had made too many errors... well don't we all? Can you imagine that—a newspaper making errors? Yes they certainly do make errors and heaps of them, and so do the people who criticize the mistakes made by newspapers.

Consider for a moment if you will—did you ever hear of the woman who forgot to salt the potatoes or meat; we would also be pleased to run across a lawyer who never lost a case because he had made some mistake; the clerk who never made some error putting up an order; the doctor who never gave a wrong diagnosis or guess; a postal employee who never sent a letter to the wrong address or put mail in the wrong box, town or rural; a carpenter who never sawed a valuable board off at the wrong place or a druggist who never—oh, well why bother?

That's the idea. Why bother to print the entire list. But it would be enlightening if some of the critics who make the most of pretty insignificant mistakes in newspapers had opportunity to know about the hundreds of mistakes newspaper people correct for them.

Food hoarders in Italy are threatened with death; which reveals totalitarian methods and the serious scarcity of "eats."

Perhaps the most significant word in President Roosevelt's speech was "arsenal."

### CUSTOMS AT ACTON SHOWS BIG INCREASE

(Acton Free Press)

Evidence of increased industrial activity in Acton is shown in the returns during the past three months at the Acton Customs Office. December set a new high monthly record of \$32,078 in collections. The figures for the same month last year was \$12,657.

For the quarter ending in December, total collections were \$71,096.82, in comparison with \$59,891.98 for the same period last year, or almost double. New industries and increased business of established industries is accountable for the new record of collections attained.

IS IT NEEDED NOW?

The St. Lawrence river project is again coming to the front and the new scheme is to be submitted to both the U. S. and Canadian governments in the near future. With the huge expenditures for national defence in both countries, and the call to citizens to lend more money to the government, we sometimes wonder whether this scheme is well-advised both here and in the United States at this time.
