HOUSE PARTY MURDER

By JAMES FREEMAN
(Associated Newspapers.)
WNU Service.

IT WAS a high-pitched, ear-splitting scream; the scream of a woman.

Following it there was a shot, a series of groans, a heavy, thud after sound.

Then silence. A profound, heavy silence.

Clyde Greene was the first to reach the corridor. Clyde's room was next to that occupied by Marie Leland.

Clyde pounded on Marie Leland's door. There was no answer, and he decided to force the lock.

By this time the corridor was filled with people. Doors opened and frightened, curious faces looked up and down.

At eight of Clyde opening Marie Leland's door, they came running.

Clyde paused just inside the room. A shapeless bulk on the floor obstructed his passage.

Doors opened and frightened, curious faces looked up and down. At eight of Clyde opening Marie Leland's door, they came running.

Clyde paused just inside the room. A shapeless bulk on the floor obstructed his passage.

Americans Becoming Nation of Pessimists

Our new distrust of the future is spoiling today for us.

We are becoming gloomy, pessimistic, ambitionless people.

We can't sit down to talk together without turning our conversation to the war abroad and from that to predictions of the future of our country.

And there is seldom any but the long-faced point of view presented.

To hear us talk, there is no chance but that the worst will happen to us. We sound like a defeated people—not like a great nation with the wealth and the potential strength to look out for ourselves.

There is too little of the strong, hearty "By heaven, he'll never lick us" talk and too much of the "intellectual" attitude which always glories in painting the worst possible picture and calling it "facing facts."

Well, let's cut it out. Let's leave the "America hasn't a chance" attitude to the Nazi propagandists who thought it up. It is more natural when it comes from them.

Let's quit the glooming. All our talk accomplishes is to get us scared and doubting.

Right now America and Americans need to play the role of the strong, silent man who doesn't have much to say but who leaves no one in doubt that he will take good care of himself in any kind of trouble.

We're foolish to sit around scaring each other—like kids who deliberately turn the lights low and scare themselves to death with ghost stories.

Great Occasions Marked In Odd, Unusual Ways

Man celebrates big events and big moments in unusual, unique and odd ways. Delving into ancient history, legend has it that Cleopatra dissolved a pearl worth around \$375,000 in her big moment of meeting Mark Anthony.

Emperor Vitellius celebrated his victory over one Otho by just eating and eating, mostly flamingo tongues.

Milo of Crotona carried an old bull on his shoulders the length of the stadium at the Olympic games back in the Sixth century, B. C., establishing a world's record for the event and sending his name down the ages.

The Messer Marco Polo, his father, and his uncle, to mark their return to Venice in 1295 after years of absence in far Cathay, appeared in their ragged garments, slit the seams and released streams of diamonds, rubies and sapphires, proving to all concerned that they were genuine Polos and relatives worth having.

And going back about two centuries it is found that Benjamin Franklin in 1750 decided to kill the Christmas turkey by means of the latest thing, electricity, and proceeded to do so for the edification of a circle of friends. In the excitement, Franklin forgot to let go of something and the current missed the bird and gave him one of the shocks of his life.

Family Trouble Starts Over Handling Finances

Nothing causes more friction in the American family than the question of who shall handle the family's finances. Man is traditionally the provider, so of course, his self-esteem makes him unable to bear the thought of a woman telling him how to handle his money.

The thing to do, according to one expert on financial problems is to treat the problem as a business concern treats it. A business concern makes its purchasing agent the shrewdest bargainer it can dig up and to hire the best bookkeepers it can find for its auditing department.

It doesn't give the purchasing job to a good contact or idea man, or the auditing jobs to a bunch of good salesmen.

Do the same thing in your home, the expert advises. Take stock of each partner—rule out the vanities and taboos—determine which of the two firm members is the better at stretching a dollar and keeping track of all the dollars that come in and go out, and then simply elect that partner canceller of the home checkbook.

Run the business side of the family as a business, unemotionally and shrewdly and you will likely detour a lot of emotional upsets, not to mention a lot of inefficient use of what money you have to use.

Safe Driving Is Dangerous?

A safe driver is one who obeys all the traffic rules and regulations. This is the belief of all motorists.

But along comes Jimmy Lynch, this belief. His theory is that the motorist who obeys "all safety measures" is on many occasions a menace to himself and to others on the highways. Lynch upsets the belief that one should put his best tires on the front wheels. He believes, he says, from experience, that there is more danger when a rear tire blows out. He also holds a contrary opinion to that of most authorities regarding fast driving. His opinion is that a slow driver causes the greater number of accidents, because a slow driver is often lulled into a false sense of security. It is also a strong temptation for the driver behind him to pass him and risk a collision. On the other hand the motorist who drives fast is conscious of his speed, is more alert and his reflexes act more quickly if an emergency arises.

Giving Them Away Cheaper

Alvie Frey of Mount Carmel, Ill., bought three cabins for 15 cents each. His were the only bids on the three buildings, included in a group of 11 items offered for sale by the Rock Island district army engineers.

The buildings, consisting of cabins and outbuildings, are on the Iowa shore of the Mississippi river, and on islands near lock and dam No. 13, Fulton, Ill.

Three other cabins on which awards were made were a little more expensive. Walter Crawford of Sabula, Ill., got two for \$1.25 each and Donald A. Arnold of Savanna, Ill., bought one for \$5.

"It's cheaper to give them away at these prices," the engineers said, "than to go to the expense of burning them."

New Serum Cures Meningitis

"Paddy" Murphy, 14-month-old son of Mr. and Mrs. Frank Murphy of Washington, D. C., was back at home recovered from a two-week illness of one of the deadliest of childhood diseases, influenza meningitis.

"Paddy" was taken to the hospital with a fever of 102 degrees. Mrs. Murphy and hospital attendants said at that time he was not expected to live.

Placing full confidence in the child's doctor, Mrs. Murphy gave permission for him to administer a new serum, never before tried in Washington. It worked perfectly, abated by the chemical sulfa-pyridine and four blood transfusions.

Somewhat weakened by the ordeal, but smiling nevertheless, Patrick played with his brothers after coming home, and for the first time in two weeks, slept in his own little crib.

U. S. Teaches Scientific Farming

On the theory that education is the best tool to combat farm failures that have resulted from poor farming and mismanagement, the federal government has undertaken a program of education in methods of scientific farming for youths of needy families who must eke out a living from submarginal farm lands.

This is the second year that the Farm Security administration together with the National Youth administration has conducted a training course for future farmers on a site adjacent to the campus of the Pennsylvania State college. The youths are selected from needy farm families throughout the state.

American Husbands Oked

American men take their wives for granted. American men don't understand women. American men are a thorn in the side of female progress; an obstacle to happy home life.

That is the attitude of American wives toward their husbands, according to a prominent woman writer. She then takes her pen in hand to hand the wives a verbal lashing or their attitude.

She declares that women have had freedom and power for centuries but it was crushed down by men because they (the women) could not take such power as they had, gracefully.

Good Pasture Foundation For Economical Beef

Good pasture is the foundation of economical beef and sheep production because it furnishes much cheaper food than harvested crops, states J. E. Comfort of the University of Missouri college of agriculture. Unless beef herds and flocks of sheep are maintained on adequate pasture during as large a part of the year as possible, the costs will generally be increased and the profits reduced.

Beef cattle, especially cows, are the most liberal users of pastures and the use of pastures with cows. On most farms the principal grazing problem in handling beef cattle is that of extending the grazing season to reduce the quantity of harvested feed required. In general, the costs of winter feed for four to six months are from two to four times as great as the cost of grazing for a period of from six to eight months.

To extend the grazing season most effectively one must have more than one permanent pasture in order to save ungrazed forage for grazing in midsummer, late fall, winter or early spring. Temporary annual pastures such as winter barley, wheat or rye and Korean lespedeza, sweet clover or sudan, may be used to supplement permanent pasture.

With such crops it is possible to begin grazing from two to four weeks earlier in the spring, to have an abundance of feed during July and August when bluegrass and other pasture grasses are dormant and to extend the period of good grazing from four to eight weeks in the fall and early winter.

Spinach Is Conducive To Physical Activity

Experiments with rats at the Pennsylvania State college have shown that spinach, which contains vitamin A, is conducive to physical activity. Dr. N. B. Guerrant, professor of biological chemistry, who conducted the experiments, declared that the effects produced in rats may be the same in humans.

In some of the tests, the rats were allowed to take voluntary exercise in special types of rotating cages, and in others the cages were rotated a definite number of times daily, a practice which forced the rats to "go for walks." The animals which were fed no vitamin A were less inclined to exercise voluntarily than those which were allowed an adequate amount of this food element in their diet. The energetic rats made smaller increases in body weight and required less vitamin A than the lazy rats, apparently because their systems made better use of the food eaten.

Thus far the investigation has shown that an adequate amount of vitamin A in the diet is conducive to physical activity. Rats which were forced to exercise actually consumed less food than litter mates which were confined or allowed to exercise at will. The fact that they consumed less food when performing vigorous exercises may not be strange, said Dr. Huerrant, pointing out that men doing hard work are inclined to eat more on their days off than when actually on the job.

Origin of Nicknames

The name "Heinie" given to the German soldier by the American doughboy during the last World War still clings to our popular speech and now refers to any German. The giving of national nicknames, so popular today, has permeated history for centuries.

From the time of Queen Elizabeth the Spaniard has been known in England as Don Whiskerandos. Cousin Michael is the European term for Germans, and Mynheer Cosh, or simply Mynheer, for Hollanders. The inhabitants of Switzerland are Colin Tampon. The Danes are known as Danskers, and Italians are Lazzarons.

The common nickname of the French, is Jean Crapaud, or Johnny Toad.

John Bull was first applied to the English people by Dr. Arbuthnot in "The History of John Bull," a satire on the duke of Marlborough, published in 1712.
